Advances in Parallel Computing Algorithms, Tools and Paradigms D. Jude Hemanth, Tu N. Nguyen, J.

Indumathi, Sairamesh Lakshmanan, 2022-11-15 Recent developments in parallel computing for various fields of application are providing improved solutions for handling data. These newer innovative ideas offer the technical support necessary to enhance intellectual decisions while also dealing more efficiently with the huge volumes of data currently involved. This book presents the proceedings of ICAPTA 2022, the International Conference on Advances in Parallel Computing Technologies and Applications, hosted as a virtual conference from Bangalore, India, on 27 and 28 January 2022. The aim of the conference was to provide a forum for the sharing of knowledge about various aspects of parallel computing in communications systems and networking, including cloud and virtualization solutions, management technologies, and vertical application areas. The conference also provided a premier platform for scientists, researchers, practitioners, and academicians to present and discuss their most recent innovations, trends, and concerns, as well as the practical challenges encountered in this field. More than 300 submissions were received for the conference, from which the 91 full-length papers presented here were accepted after review by a panel of subject experts. Topics covered include parallel computing in communication, machine learning, intelligence for parallel computing, and parallel computing for software services in theoretical and practical aspects. Providing an overview of recent developments in the field, the book will be of interest to all those whose work involves the use of parallel computing technologies.

National Guide to Funding for Information Technology Gina-Marie Cantarella, 1999 This volume represents a valuable source of information for organizations eager to enhance their services with the latest technologies. The National

Guide provides essential facts on over 400 grantmakers each with a history of awarding grant dollars to projects involving information technology. Imagine the time you will save by having in a single convenient source a list of grantmakers already interested in this field. The National Guide covers all the facts you need to bolster your target list of funding prospects. Each entry provides crucial data: address, financial data, giving priorities, application procedures, contact names and key officials. The volume also includes close to 1,500 descriptions of recently awarded grants, a sure indication of foundation giving interests. A range of indexes will help you target funders by specific program areas favored and geographic areas preferred by grantmakers. Each year the grantmakers featured in this volume award millions of dollars for projects involving computer science, engineering and technology, telecommunications and media and communications to a range of educational institutions and other nonprofit organizations. Don't let your organization miss its share of foundation grant dollars. Order your copy today.
