The latest edition continues to prepare teachers to create and implement literacy-rich curricula in early childhood classrooms while providing updates to federal legislation and highlighting the impact of state standards on educational settings. Recent technology is integrated into activities used to enhance literacy competencies. Throughout the book, the author's approach to reflective teaching empowers teachers to become effective decision makers and thoughtful mediators in children's transactions with literacy. A conceptual and theoretical foundation for describing reading and writing processes is followed by research-based descriptions of the signs of emergent literacy and developmentally appropriate instructional strategies. The emphasis on linguistic and cultural diversity includes an array of approaches for supporting English language learners. Chapter extension activities challenge readers to apply concepts through observation, research, curriculum development, and discussion.
