Causes of International War Goldsworthy Lowes Dickinson, 1920 **Causes of International War (Classic Reprint)** G. Lowes Dickinson, 2015-07-08 Excerpt from Causes of International War The object of this series is twofold to disseminate knowledge of the facts of international relations and to inculcate the international rather than the nationalistic way of regarding them This latter purpose implies no distortion of facts It is hoped that the books will be found to maintain a high standard of accuracy and fairness But their avowed object is not merely to record facts but to present them in a certain light and with a certain object That light is Internationalism and that object the peace of the world If the series is successful in its purpose it will contribute to what Wells has called the international mind The object has been to produce the books at a price that shall not be prohibitive to people of small incomes For the world cannot be saved by governments and governing classes It can be saved only by the creation among the peoples of the world of such a public opinion as cannot be duped by misrepresentation nor misled by passion The difficulties of that achievement can hardly be exaggerated but ought not to daunt And the editor ventures to hope for support for men of good will in this one attempt among the many others to enlighten the intelligence and direct the will About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally reconstruct the work preserving the original format whilst repairing imperfections present in the aged copy In rare cases an imperfection in the original such as a blemish or missing page may be replicated in our edition We do however repair the vast majority of imperfections successfully any imperfections that remain are intentionally left to preserve the state of such historical works International War Its Causes and Its Cure (Classic Reprint) Oscar T. Crosby, 2015-07-08 Excerpt from International War Its Causes and Its Cure The views expressed in this volume first appeared in a pamphlet published in 1911 The general principles concerning the possibility of eliminating international war are deducible from the 8000 years of human history which was available to us before the fatal events of 1914 A student addressing himself to the subject before that date might indeed fail to arrive at sound conclusions but his failure would not be due to lack of material It would have been possible and perhaps from the point of view of current interest desirable to illustrate the various doctrines presented by citing the incidents of the Great War On the other hand very recent happenings involving great passions are always the subject of hottest controversy and therefore scarcely suitable for use in a work which strives with whatever success to urge its doctrines on grounds which may be accepted or rejected by readers independently of their nationality The book was written before the entrance of the United States Government into the war The delay in publication has been due to the advice of some whose opinions the author was bound to respect About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books Find more at www.forgottenbooks.com This book is a reproduction of an important historical work Forgotten Books uses state of the art technology to digitally

USIS cultural centers and libraries **Hearst's International Combined with Cosmopolitan** ,1930 From Wealth to Power Fareed Zakaria,1999-08-15 What turns rich nations into great powers How do wealthy countries begin extending their influence abroad These questions are vital to understanding one of the most important sources of instability in international politics the emergence of a new power In From Wealth to Power Fareed Zakaria seeks to answer these questions by examining the most puzzling case of a rising power in modern history that of the United States If rich nations routinely become great powers Zakaria asks then how do we explain the strange inactivity of the United States in the late nineteenth century By 1885 the U S was the richest country in the world And yet by all military political and diplomatic measures it was a minor power To explain this discrepancy Zakaria considers a wide variety of cases between 1865 and 1908 when the U S considered expanding its influence in such diverse places as Canada the Dominican Republic and Iceland Consistent with the realist theory of international relations he argues that the President and his administration tried to increase the country s political influence abroad when they saw an increase in the nation s relative economic power But they frequently had to curtail their plans for expansion he shows because they lacked a strong central government that could harness that economic power for the purposes of foreign policy America was an unusual power a strong nation with a weak state It was not until late in the century when power shifted from states to the federal government and from the legislative to the executive branch that leaders in Washington could mobilize the nation s resources for international influence Zakaria s exploration of this tension between national power and state structure will change how we view the emergence of new powers and deepen our understanding of America s exceptional history Contemporary Wars and Conflicts over Land and Water in Africa Carlson Anyangwe,2022-08-08 Contemporary Wars and Conflicts over Land and Water in Africa highlights Africa s tragedy of endless conflicts Rich in case studies it examines violent conflicts and Africa s approaches to conflict resolution The case studies show that Africa continues to be a chronically unstable space tormented especially by frequent and devastating civil wars of which ethnicity religion and bad governance are some of the root causes These conflicts have occasioned massive human rights abuses arrested development reversed or slowed economic growth created a vicious circle of instability and hunger and exacerbated levels of poverty and disease in the continent In the final part of this book Carlson Anyangwe considers indigenous mechanisms for settling disputes post conflict transitional justice systems and the African Union conflict resolution mechanism that relies as it does on the United Nations peace and security framework and the peace and security functions of the African regional economic organizations **Play Among Books** Miro Roman,Alice_ch3n81,2021-12-06 How does coding change the way we think about architecture This question opens up an important research perspective In this book Miro Roman and his AI Alice_ch3n81 develop a playful scenario in which they propose coding as the new literacy of information They convey knowledge in the form of a project model that links the fields of architecture and information through two interwoven narrative strands in an infinite flow of real books Focusing on the intersection of information

technology and architectural formulation the authors create an evolving intellectual reflection on digital architecture and computer science **Conflict and Cooperation** Marc A. Genest,1996 Appropriate for introductory courses in international relations this reader is designed to acquaint students with the fundamental principles of and treatises on international relations theory The Graphic ,1919 *Books of 1912-* Chicago Public Library,1917 **Books in Print Supplement** ,2002 *Congressional Serial Set* ,1895 **International Books in Print** ,1986 Guide to Reprints Albert James Diaz,1994 *Cambridge Magazine* ,1915
