*Unsettling Translation* Mona Baker, 2022-05-30 This collection engages with translation and interpreting from a diverse but complementary range of perspectives in dialogue with the seminal work of Theo Hermans A foundational figure in the field Hermans s scholarly engagement with translation spans several key areas including history of translation metaphor norms ethics ideology methodology and the critical reconceptualization of the positioning of the translator and of translation itself as a social and hermeneutic practice Those he has mentored or inspired through his lectures and pioneering publications over the years are now household names in the field with many represented in this volume They come together here both to critically re examine translation as a social political and conceptual site of negotiation and to celebrate his contributions to the field The volume opens with an extended introduction and personal tribute by the editor which situates

Hermans's work within the broader development of critical thinking about translation from the 1970s onward. This is followed by five parts each addressing a theme that has been broadly taken up by Theo Hermans in his own work: translational epistemologies, historicizing translation, performing translation, centres and peripheries, and digital encounters. This is important reading for translation scholars, researchers and advanced students on courses covering key trends and theories in translation studies and those engaging with the history of the discipline. **Bodily Fluids in Antiquity** Mark Bradley, Victoria Leonard, Laurence Totelin, 2021-04-26. From ancient Egypt to Imperial Rome, from Greek medicine to early Christianity, this volume examines how human bodily fluids influenced ideas about gender, sexuality, politics, emotions and morality, and how those ideas shaped later European thought. Comprising 24 chapters across seven key themes—language, gender, eroticism, nutrition, dissolution, death and afterlife—this volume investigates bodily fluids in the context of the current sensory turn. It asks fundamental questions about physicality and fluidity: how were bodily fluids categorised and differentiated? How were fluids trapped inside the body perceived and how did this perception alter when those fluids were externalised? Do ancient approaches complement or challenge our modern sensibilities about bodily fluids? How were religious practices influenced by attitudes towards bodily fluids and how did religious authorities attempt to regulate or restrict their appearance? Why were some fluids taboo and others cherished? In what ways were bodily fluids gendered? Offering a range of scholarly approaches and voices, this volume explores how ideas about the body and the fluids it contained and externalised are culturally conditioned and ideologically determined. The analysis encompasses the key geographic centres of the ancient Mediterranean basin, including Greece, Rome, Byzantium and Egypt. By taking a longue durée perspective across a richly intertwined set of territories, this collection is the first to provide a comprehensive, wide-ranging study of bodily fluids in the ancient world. *Bodily Fluids in Antiquity* will be of particular interest to academic readers working in the fields of classics and its reception, archaeology, anthropology and ancient to Early Modern history. It will also appeal to more general readers with an interest in the history of the body and history of medicine. *Critica* Egil Kraggerud, 2020-09-03. Gathering together over 60 new and revised discussions of textual issues, this volume represents notorious problems in well-known texts from the classical era by authors including Horace, Ennius and Vergil. A follow-up to *Vergiliana Critical Studies* on the Texts of Publius Vergilius Maro (2017), the volume includes major contributions to the discussion of Horace's Carmen IV 8 and IV 12, along with studies on Catullus' Carmen 67 and Hadrian's *Animula vagula*, as well as a new contribution on Livy's text at IV 20 in connection with Cossus's *spolia opima* and on Vergil's Aeneid 3.147–152 and 11.151–153. On Ennius, the author presents several new ideas on Ann. 42 Sk and 220.221, and in editing Horace he suggests new principles for the critical

apparatus and tries to find a balance by weighing both sides in several studies comparing a conservative and a radical approach Critica will be an important resource for students and scholars of Latin language and literature The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4 0 license **Encyclopedia of Greek and Roman Mythology** Luke Roman, Monica Roman, 2010 Greek and Roman mythology has fascinated people for more than two millennia and its influence on cultures throughout Europe America North Africa and the Middle East attests to the universal appeal of the stories This title examines the best known figures of Greek and Roman mythology together with the great works of classic literature
