Causation In International Relations Causation In International Relations:

Causation in International Relations Milja Kurki, 2008-04-03 World political processes such as wars and globalisation are engendered by complex sets of causes and conditions Although the idea of causation is fundamental to the field of International Relations what the concept of cause means or entails has remained an unresolved and contested matter In recent decades ferocious debates have surrounded the idea of causal analysis some scholars even questioning the legitimacy of applying the notion of cause in the study of International Relations This book suggests that underlying the debates on causation in the field of International Relations is a set of problematic assumptions deterministic mechanistic and empiricist and that we should reclaim causal analysis from the dominant discourse of causation Milja Kurki argues that reinterpreting the meaning aims and methods of social scientific causal analysis opens up multi causal and methodologically pluralist avenues for future International Relations scholarship

Causal Inquiry in International Relations Adam R. C.

Humphreys, Hidemi Suganami, 2024-09-26 This is an open access title available under the terms of a CC BY NC ND 4 0 licence It is free to read at Oxford Scholarship Online and offered as a free PDF download from OUP and selected open access locations Causal Inquiry in International Relations defends a new philosophically informed account of the principles which must underpin any causal research in a discipline such as International Relations Its central claim is that there is an underlying logic to all causal inquiry at the core of which is the search for empirical evidence capable of ruling out competing accounts of how specific events were brought about Although this crucial fact is obscured by the culture of generalization which predominates in contemporary social science all causal knowledge ultimately depends on the provision of empirical support for concrete claims about specific events located in space and time This book not only explores existing philosophical debates around causation but also provides a detailed study of some of the most fundamental methodological questions which arise in the course of causal inquiry Using examples drawn from philosophy and from the study of international relations it demonstrates what is problematic about established ways of thinking brings new clarity to both philosophical and methodological questions and seeks to enhance collective understanding of the contribution that causal inquiry can make to empirically rich and critically aware scholarship about world politics It concludes by situating causal inquiry in relation to other forms of inquiry employed in the study of world politics emphasizing especially the often unnoticed dependence of causal inquiry on precisely the kind of knowledge of specific events which historians are well placed to provide

Richard Ned Lebow: Essential Texts on Classics, History, Ethics, and International Relations Richard Ned Lebow, 2016-09-19

Causation in International Law

Orakhelashvili, Alexander, 2022-10-13 In this cutting edge book Alexander Orakhelashvili addresses the doctrine of causation

examining its suitability to influence or contribute to the process of responsibility of State and non State actors in international law In doing so the book considers the record so far and places the international legal system's practical experience within its normative context **Elgar Encyclopedia of International Relations** Beate Jahn, Sebastian Schindler, 2025-03-12 This Encyclopedia provides a comprehensive account of the theoretical and practical development of international relations Experts in the field examine the intellectual and political relevance of core concepts from liberalism and constructivism to war and conspiracy This title contains one or more Open Access chapters **A New A-Z of International Relations Theory** Chris Farrands, Imad El-Anis, Roy Smith, 2015-07-10 International Relations is the multi disciplinary and heterogeneous study which goes to the heart of relations between states and international organisations embracing international politics economics political economy diplomatic and international history It seeks to explain the mainsprings of global politics which is a prime field for historians and especially for political scientists and IR theory and provides the essential intellectual underpinning of the discipline This book features over 250 alphabetical entries covering the most important and the latest cutting edge theory from anarchy to world systems theory Entries include scholars writers concepts principal debates argumentation theories leading schools of thought states international bodies conflicts and war treaties and alliances The coverage is global and comprehensive with substantial cross referencing and the extensive index serves as a major reference tool enabling readers to pick up additional important subjects from the main alphabetical entries Clear and concise writing cuts through even the most opaque theoretical subjects and the result is an essential reference guide for students of International Relations politics and history and will guide both specialists and general readers through the fast changing complexities of global politics **Constructing Cause in International Relations** Richard Ned Lebow, 2014-02-20 Cause is a problematic concept in social science as in all fields of knowledge We organise information in terms of cause and effect to impose order on the world but this can impede a more sophisticated understanding In his latest book Richard Ned Lebow reviews understandings of cause in physics and philosophy and concludes that no formulation is logically defensible and universal in its coverage This is because cause is not a feature of the world but a cognitive shorthand we use to make sense of it In practice causal inference is always rhetorical and must accordingly be judged on grounds of practicality Lebow offers a new approach inefficient causation that is constructivist in its emphasis on the reasons people have for acting as they do but turns to other approaches to understand the aggregation of their behaviour This novel approach builds on general understandings and idiosyncratic features of context **Why Not Preempt?** Rachel Bzostek, 2008 Anticipatory military activities both preemptive and preventive are at the centre of American strategic doctrine Rachel Bzostek puts forward a full understanding of why states have or have not undertaken such activities in the past in order to comprehend why states have rarely used this method **Analyzing International Relations** William D. Coplin, Charles W. Kegley, 1975 **Essential Modern World History** Steven Waugh, 2001 Represents a package for the GSCE

specifications Accompanying the student book this book is written in line with the OCR Modern World GCSE specification The pack consists of a breakdown of different types of questions in the written examination papers at two levels C D and A A It has coverage of content options within each question type *The Greenwood Encyclopedia of International Relations: A-E* Cathal J. Nolan,2002 Using humanistic principles to strip away the jargon and narrowness inherent in much of modern day political scholarship this historical encyclopedia reclaims the breadth of vision the privileging of factual evidence over theory and the moral tenor prevalent in classical political inquiry Over 6 000 alphabetically arranged entries accompanied by 29 maps make this single authored set the definitive desktop reference work on international relations and international history The book s primary focus is upon the rise of the Great Powers and the course of world civilizations their formative wars and diplomatic political and economic relations But a serious effort is made to cover all of the smaller and less powerful regions and their local history along with how progressive inclusion into the modern state system affected them both for good and ill Written with elegant clarity and leavened by healthy doses of professional skepticism and humor this thoroughly cross referenced work addresses general as well as specialized readers seeking clear and concise sketches of the topics simple and complex that have shaped political and historical developments in our world The work takes firm stands on important issues It is not morally neutral on the meaning of historical persons or events But it is eminently fair its standard of objectivity and judgment has been to write about all nations religions and events as a historian without country or religion in the words of John Quincy Adams While remaining deeply serious and cognizant of the role of the tragic in human history this book often displays biting wit and overall personality a great benefit of the single author approach Whether or not readers agree with a given interpretation they are always paid the deep respect of having their intellect minds and moral consciousness engaged with the deeper meaning of the history of international public affairs Scientific Realism and International Relations

Jonathan Joseph,Colin Wight,2010-07-30 Contemporary theory of international politics faces a twofold problem the critical engagement with legacies of national power politics in connection to 20th Century International Relations and the regeneration of notions of humanity This book contributes to this engagement by a genealogy of thoughts on war peace and ethics Provided by publisher *Proceedings of the Institute of International Relations* Institute of International Relations,1928 International University Lectures: Psychology. Chemistry. Astronomy. Physics. Metaphysics. Logic. Ethnics. Mathematics. Utilitarian science. Medicine ,1909 *Classics of International Relations* John A. Vasquez,1986

Innovative in its mixture of classic and contemporary readings by our greatest thinkers and scholars this highly reputable and popular book provides one of the best single analyses and introductions to the most enduring questions of international relations Now updated with many selections from the 1990s the collection examines 1 the relationship between morality and politics 2 whether international relations can be a science 3 the nature of foreign policy and global conflict and 4 how to create lasting peace with a special focus on how to build and maintain peace in the post cold war era Links the thought of the

past with the research of the present including choice work from Western civilization and the best articles of the discipline published in the last 60 years Contains classic readings from the 1980s and 1990s reflecting the major intellectual currents having a profound effect on the field with new articles on conflict resolution the new world order feminist approaches the third debate and post modernism and democracy and peace For professionals in the international relations field
