Managing Emotion in Byzantium Margaret Mullett, Susan Ashbrook Harvey, 2022-09-30 Byzantinists entered the study of emotion with Henry Maguire's ground breaking article on sorrow published in 1977. Since then classicists and western medievalists have developed new ways of understanding how emotional communities work and where the ancients' concepts of emotion differ from our own and Byzantinists have begun to consider emotions other than sorrow. It is time to look at what is distinctive about Byzantine emotion. This volume is the first to look at the constellation of Byzantine emotions. Originating at an international colloquium at Dumbarton Oaks, these papers address issues such as power, gender, rhetoric, or asceticism in Byzantine society through the lens of a single emotion or cluster of emotions. Contributors focus not only on the construction of emotions with respect to perception and cognition but also explore how emotions were communicated and exchanged across broad multi-linguistic, political, and social boundaries. Priorities are twofold: to arrive at an understanding of what the Byzantines thought of as emotions and to comprehend how theory shaped their appraisal of reality. *Managing Emotion in Byzantium* will appeal to researchers and students alike interested in Byzantine perceptions of emotion. Byzantine Culture and medieval perceptions of emotion

Fate, Providence and Free Will: Philosophy and Religion in Dialogue in the Early Imperial Age, 2020-08-31 This volume offers a collection of papers about the notions of fate, providence, and free will as developed and debated in philosophy and religion in the early Imperial age ca. 31 BCE–250 CE

Time and Cosmology in Plato and the Platonic Tradition, 2022-02-14 The way Plato discusses time and its relation to the cosmos has puzzled and divided his readers from the very beginning. This originated rich and diverse readings that shaped and contributed to the cosmological discussion of the Hellenistic and Late Antiquity periods. Modern scholars too have offered many and often opposed views on the matter. This book assembles an international team of scholars to move forward the study of Plato's conception of time to find fresh insights for interpreting his cosmology and to reimagine the ancient Platonic tradition

The Metaphysics of Light in the Hexaemeral Literature Isidoros C. Katsos, 2023-02-14 This volume critically re-evaluates the received interpretation of the nature of light in the ancient sources. Isidoros C. Katsos contests the prevalent view in the history of optics according to which pre-modernity theorized light as subordinate to sight (oculocentrism) by examining in depth the contrary textual evidence found in early Christian texts. It shows that from Philo of Alexandria and Origen to Basil of Caesarea and Gregory of Nyssa, the Jewish-Christian commentary tradition on the hexaemeral literature, the biblical creation narrative reflected deeply on the nature and physicality of light for the purposes of understanding the structure and purpose

of material creation Contemplation of nature allowed early Christian thinkers to conceptualize light as the explanatory principle of vision rather than subordinated to it Contrary to the prevalent view the hexaemeral literature necessitates a luminocentric interpretation of the theory of light of Plato's Timaeus in its reception history in the context of late antique cosmology Hexaemeral luminocentrism invites the reader of Scripture to grasp not only the sensible properties of light but also their causal principle as the first manifestation of the divine Logos in creation The hexaemeral metaphysics thus provides the missing ground of meaning of the early Christian language of light

Gregory of Nyssa: On the Hexaemeron Johannes Zachhuber, Anna Marmodoro, 2025-03-25 This book presents Gregory of Nyssa's On the Six Days of Creation In Hexaemeron as a specimen of Early Christian philosophy It comprises Gregory of Nyssa's text in its Greek original accompanied by a new English translation and seven accompanying essays by international specialists from diverse backgrounds Each essay focuses on a section of the text and the arising philosophical issues The essays complement each other in offering multiple perspectives on how Gregory's text may be approached philosophically and positioned in relation to other more or less contiguous philosophical theories including the early Greeks Anaxagoras and Empedocles Aristotle and the Stoics Rather than presenting a definite and exhaustive state of the art study of Gregory's text this volume aims to open new pathways for research into In Hexaemeron

Time and Timelessness in Fundamental Physics and Cosmology Silvia De Bianchi, Marco Forgione, Laura Marongiu, 2024-08-29 This book offers a clear account of timelessness together with the discussion of temporality in fundamental physics and cosmology The multi disciplinary approach to the problem of time and timelessness shows the remarkable difference between pre relativistic debates and current developments This book thoroughly discusses notions of timelessness and time emerging in the most recent literature on Quantum Gravity String Theory and Cosmology The contributions explore among many aspects the historical philosophical roots of the notions of temporality and atemporality the role of mathematics in defining time and temporality with respect to both order relations and causality approaches to quantum gravity and cosmology that make use of quantum fluids and condensate to approximate space time in general relativity time and timelessness in black holes and the problem of cosmological time in bouncing cosmologies The novelty of this volume lies in the interaction among scientists philosophers and historians in exploring the nature of time and timelessness and the origin of these concepts The book represents a valuable toolkit for researchers and graduate students in physics cosmology philosophy and the history of those fields

The World and God Are Not Two Daniel Soars, 2023-04-25 The World and God Are Not Two is a book about how the God in whom Christians believe ought to be understood The key conceptual argument that runs throughout is that the distinctive relation between the world and God in Christian theology is best understood as a non dualistic one The two God and World cannot be added up as separate enumerable realities or contrasted with each other against some common background because God does not belong in any category and creatures are ontologically constituted by their relation to the Creator In exploring the unique character of this

distinctive relation Soars turns to Sara Grant's work on the Hindu tradition of Advaita Vedānta and the metaphysics of creation found in Thomas Aquinas. He develops Grant's work and that of the earlier Calcutta School by drawing explicit attention to the Neoplatonic themes in Aquinas that provide some of the most fruitful areas for comparative engagement with Vedānta. To the Christian the fact that the world exists only as dependent on God means that world and God must be ontologically distinct because God's existence does not depend on the world. To the Advaitin this simultaneously means that World and God cannot be ontologically separate either. The language of non-duality allows us to see that both positions can be held coherently together without entailing any contradiction or disagreement at the level of fundamental ontology. What it means to be world does not and cannot exclude what it means to be God. *The Philosopher's Index*, 2008 Vols for 1969 include a section of abstracts. Pilgrim-memories John S. Stuart-Glennie, 1875 The Exegete and homiletic monthly, ed. by J. Kernahan James Kernahan, 1880 *Philoponus on Aristotle's On Coming-to-be and Perishing 1.6-2.4* John Philoponus, 1999 In every case Philoponus takes Aristotle's discussions further and his ideas concerning the dependence of some qualities on others are very relevant to the continuing philosophical debate on the subject. **BOOK JACKET** *On Aristotle On Coming-to-be and Perishing 1.6-2.4* John Philoponus, 1999 No Marketing Blurb **Majnūn** Michael Walters Dols, 1992 This is a study of madness in the medieval Islamic world. Using a wide variety of sources historical literary and art the late Michael Dols explores beliefs about madness in Islamic society and examines attitudes towards individuals afflicted by mental illness or disability. The book demonstrates the links between Christian and Muslim medical beliefs and practices and traces the influence of certain Christian beliefs such as miracle working on Islamic practices. It breaks new ground in analyzing the notions of the romantic fool, the wise fool and the holy fool in medieval Islam within the framework of perceptions of mental illness. It shows that the madman was not regarded as a pariah, an outcast or a scapegoat. This is a comprehensive and original work with insights into magic, medicine and religion that combine to broaden our understanding of medieval Islamic society. *The Flaming Sword*, 1916
