[Honda Motorcycles Workshop Manual 125-150 Twins 1959-1966](#) Floyd Clymer,Velocepress,2009-06-01 A faithful
reproduction of the 1967 Floyd Clymer publication of the official Honda Factory Workshop Manual for the 125 150 series
C92 CS92 CB92 C95 and CA95 There are exhaustive tables of technical data tolerances and fits and all of the expected data
from a factory publication for the repair and overhaul of all major and minor mechanical and electrical components making it
an invaluable resource for collectors and restorers of these classic Honda motorcycles There are 228 illustrations and each
procedure is explained in a step by step method using an appropriate illustration The translation from Japanese to English is
at times a little quirky but the profuse illustrations make up for any difficulty in understanding what needs to be done There
are separate sections that deal with the repair and overhaul procedures for the engine transmission wheels and brakes front
forks frame and carburetor plus a detailed electrical service section This is a must have reference for any Honda enthusiast
and would certainly assist in helping any potential purchaser better understand the inner workings prior to purchasing one of
these classic motorcycles Out of print and unavailable for many years this book is highly sought after on the secondary
market and we are pleased to be able to offer this reproduction as a service to all Honda enthusiasts worldwide [Honda](#)

illustrations and charts size 8 25 x 10 75 inches This workshop manual is a compilation of 12 original Honda publications It
includes a reproduction of the original 100cc 125cc factory workshop manual plus the 11 factory supplements that extend
the coverage of that original manual through 1984 The original base manual for this series of motorcycles was first published
in 1970 in softbound format In 1971 it was changed to a ring bound publication as this better suited the addition of
supplements for model updates without the need for printing an entirely new manual The 1970 softbound manual covered
the CB100 CL100 and SL100 and in 1971 that softbound publication was updated and reprinted to include the CB125S

CD125S and the SL125 A little later but still in 1971 the first ring bound version was issued which now included a supplement for the TL125 However by the end of 1976 all of those models with the exception of the CB125 had been discontinued but the base ring bound manual continued to be updated through 1984 for the CB125 models For some inexplicable reason even though 1985 was the final year for the CB125 instead of publishing yet another update Honda issued a singular manual specific to the 1985 model only This 257 page manual covers the 1970 to 1984 single cylinder street scrambler motosport and trials models The primary focus is the maintenance and repair of the major mechanical and electrical components including Engine Transmission Clutch Fuel Electrical Frame Suspension and Steering models covered are 100cc Street CB100 100cc Scrambler CL100 100cc Motosport SL100 125cc Street CB125 CB125S CB125J CD125S 125cc Motosport SL125 125cc Trials TL125 Many of the earlier Honda motorcycle models were often introduced at different times in different countries using different model names or designations For example the CB125 was first introduced in 1971 but was not available in the USA as the CB125S until 1973 These varying release dates and differing model designations often lead to difficulty in selecting the correct workshop manual Worse yet owners of this series of 100cc and 125cc singles are subjected to considerable confusion surrounding the appropriate selection from the multitude of OEM publications that have recently flooded the on line marketplace Honda published 11 different supplements and addendums to the original ring bound base manual and many of these are listed as workshop manuals by individuals that deliberately intend to deceive or really have no idea what they are selling In addition many of the so called workshop manual reprints are incomplete Consequently should you decide to purchase your manual elsewhere you are advised to confirm that it includes all 257 pages of the original factory manual Owners of the 1959 1966 twin cylinder 125 150cc Benly C92 C95 series are directed to our Honda factory workshop manual ISBN 9781588500823 owners of the 1964 1980 twin cylinder 125 150cc models will require our workshop manual ISBN 9781588502643 Finally please note that the text in the original Honda Factory Workshop Manual was translated from Japanese into English Consequently some of the phrasing grammar punctuation and word usage may be subtly different from that commonly used in the English language However the information as presented is readily understandable In addition while we have done our best to identify any anomalies and errors that may have occurred during the original translation process we are certain that we will have missed one or two and we request your indulgence in ignoring them
