

# THE FUTURE OF THE EUROPEAN BUILT ENVIRONMENT

What will the European built environment look like in 2050? It is shaped by the effects of climate change, resource scarcity, changing population, urbanisation, and focus on health and well-being buildings.

Integrate a vast array of technologies that connect buildings to information management and sharing platforms. Buildings are embedded into temporary storage of renewable resources and products and have become the places that support natural resource efficiency and well-being.

## CLIMATE RESILIENT

Buildings are entirely climate resilient. Smart energy neutral buildings that are designed to withstand floods and heat stress and that are part of climate resilient cities and urban areas.

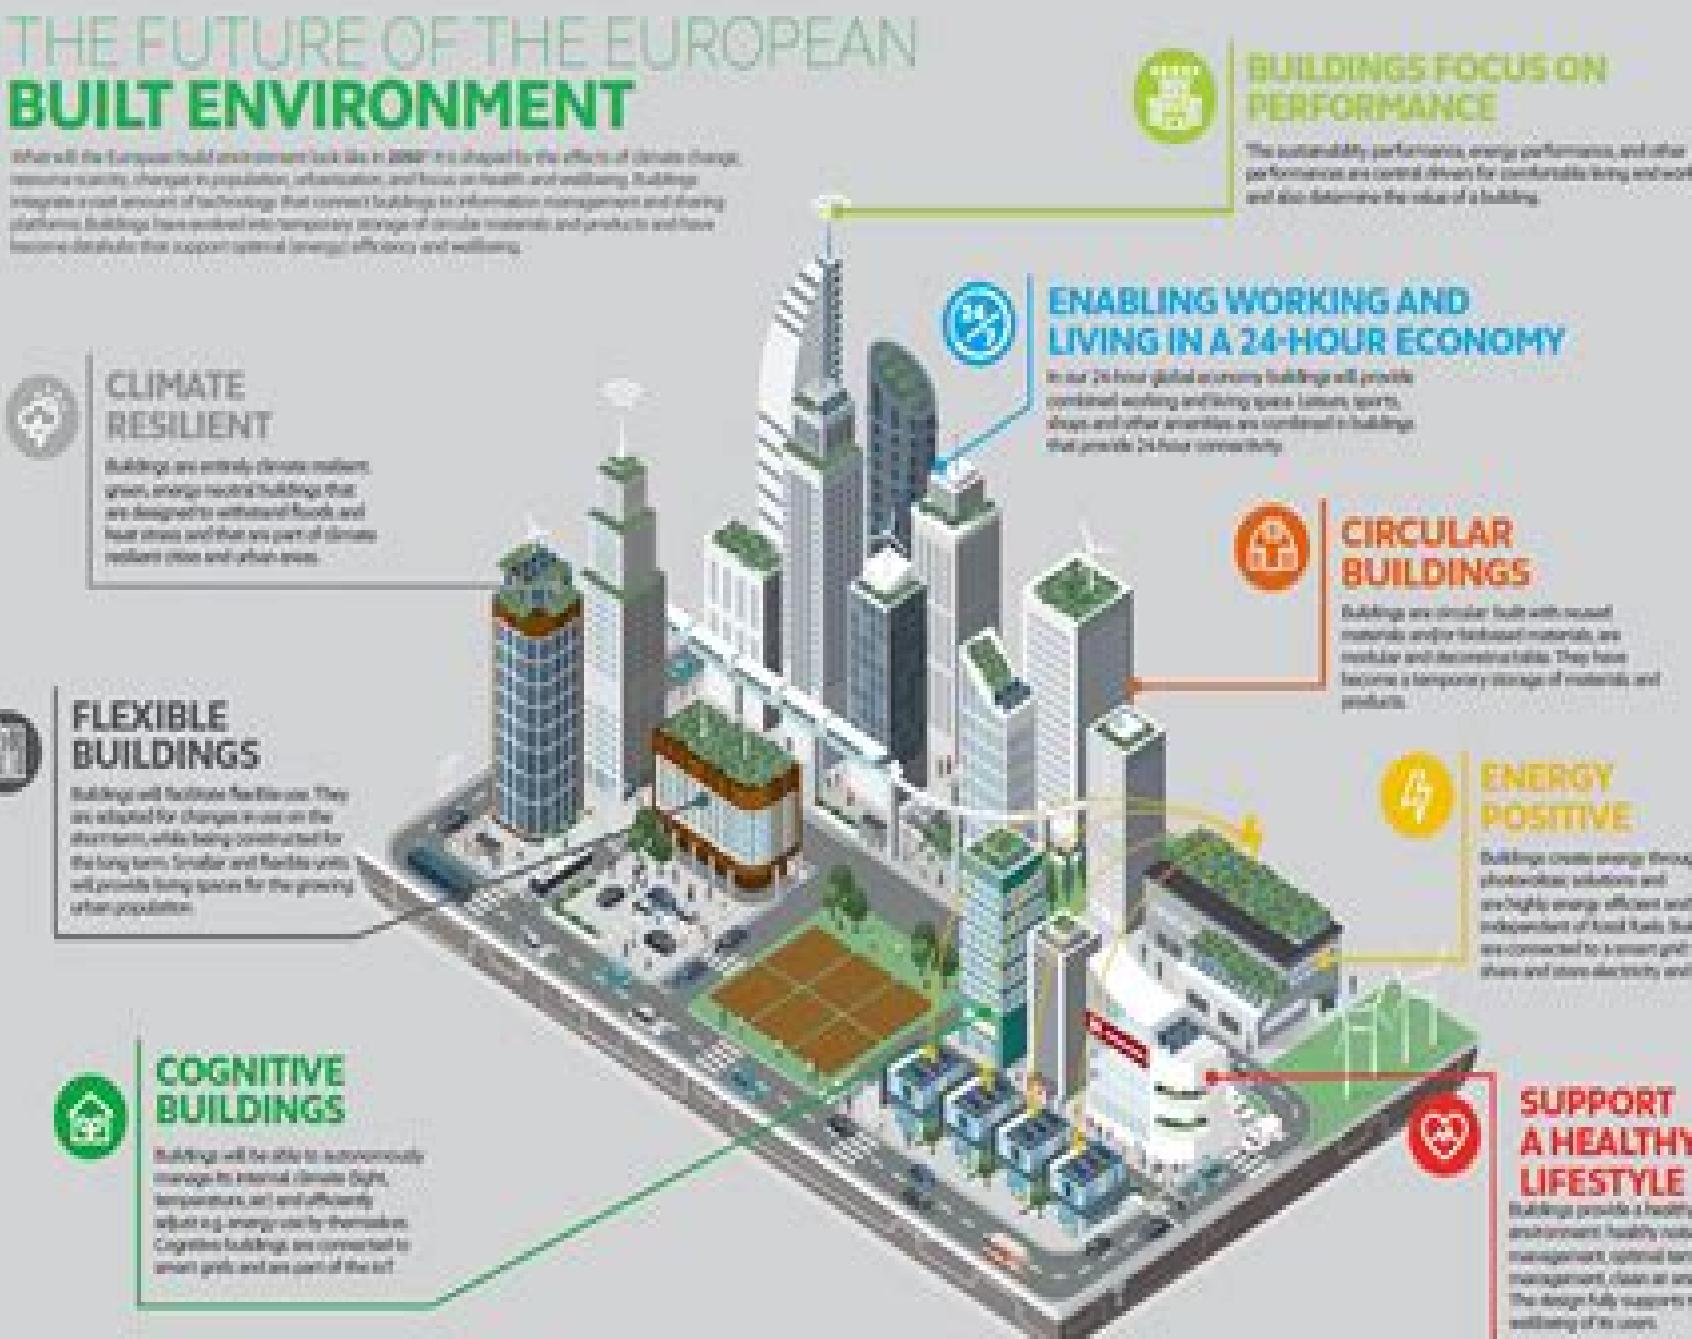

## FLEXIBLE BUILDINGS

Buildings will facilitate flexible use. They are adapted for changes based on the short-term, while being constructed for the long-term. Flexible and flexible urban areas provide living spaces for the growing urban population.

## COGNITIVE BUILDINGS

Buildings will be able to automatically manage its internal climate (light, temperature, air) and efficiently adjust its energy use by themselves. Cognitive buildings are connected to smart grids and are part of the IoT.

## BUILDINGS FOCUS ON PERFORMANCE

The sustainability performance, energy performance, and other key performances are central drivers for comfortable living and working, and also determine the value of a building.

## ENABLING WORKING AND LIVING IN A 24-HOUR ECONOMY

In our 24-hour global economy buildings will provide combined working and living spaces (living spaces, places and other amenities are embedded in buildings) that provide 24-hour connectivity.

## CIRCULAR BUILDINGS

Buildings are circular built with natural materials and/or bio-based materials, are modular and deconstructable. They have temporary storage of materials and products.

## ENERGY POSITIVE

Buildings create energy through efficient energy solutions and are highly energy efficient and independent of fossil fuels. Buildings are connected to a smart grid to share and store electricity without.

## SUPPORT A HEALTHY LIFESTYLE

Buildings provide a healthy environment, healthy noise management, a regulated temperature management, clean air and daylight. The design fully respects the well-being of its users.
