## **Ccnp Troubleshooting Instructor Lab Manual:**

**CCNP TSHOOT** Cisco Networking Academy, 2010-10-15 A CCNP certification equips students with the knowledge and skills needed to plan, implement, secure, maintain, and troubleshoot converged enterprise networks. The CCNP certification requires candidates to pass three 120 minute exams: ROUTE 642-902, SWITCH 642-813, and TSHOOT 642-832, that validate the key competencies of network engineers. The Cisco Networking Academy curriculum consists of three experience-oriented courses that employ industry-relevant instructional approaches to prepare students for professional-level jobs. CCNP ROUTE Implementing IP Routing, CCNP SWITCH Implementing IP Switching, and CCNP TSHOOT Troubleshooting and Maintaining IP Networks. This course teaches students how to monitor and maintain complex enterprise routed and switched IP networks. Skills learned include the planning and execution of regular network maintenance as well as support and troubleshooting using technology-based processes and best practices based on systematic and industry-recognized approaches. Extensive labs emphasize hands-on learning and practice to reinforce troubleshooting techniques. CCNP ROUTE and CCNP SWITCH are both prerequisites for this course.

**CCNP Practical Studies** Donna L. Harrington, 2003 Gain hands-on experience of CCNP Support topics with lab scenarios aligned to the CIT course. Real-world practice labs for each topic included in the CCNP Support exam complement theoretical study materials. Guides how to set up a test lab or walk through the screen shots to solve real-world situations. Lab scenarios enable readers to test their ability to independently complete a lab. Comprehensive appendix lists Cisco equipment resellers. CCNP Practical Studies Support prepares readers for the CCNP Support exam and real-world application of LAN and WAN technologies through a series of lab scenarios. A guide to gaining hands-on experience, this title can serve as a valuable self-study element in a CCNP candidate's preparation. Each chapter includes a review of the applicable technology along with one or more real-world trouble tickets that are delivered through screen shots of relevant troubleshooting commands. Screen shots emphasize important concepts and trouble spots as required. Chapters suggest additional references such as utilities, web sites, and/or supplemental reading. All of the topics in the CCNP Support exam are covered in this book. Each chapter addresses a section of the CCNP Support exam, including IP, IPX, Ethernet, Frame Relay, ISDN, Dial, Cat, and vLANs. For those lacking the lab equipment to practice on, this title highlights the steps needed to accomplish various crucial tasks, providing concrete examples for the challenges faced in real-world configuration. Donna L. Harrington is a Lead Engineer at General Dynamics and has over 20 years experience in the Information Systems, telecommunications, business management, and electronics field. She has taught Cisco, Microsoft, and Novell certified courses for several years. Donna has developed and delivered courses for the Information and Telecommunication Systems for Business and the Police Executive Leadership Graduate Programs at John Hopkins University and provided consulting and training for numerous local businesses throughout her career.
