Cdip Exam Discussion:

Journal of AHIMA, 2008 **Global Citizenship Education** Abdeljalil Akkari, Kathrine Maleq, 2020-08-18 This open access book takes a critical and international perspective to the mainstreaming of the Global Citizenship Concept and analyses the key issues regarding global citizenship education across the world In that respect it addresses a pressing need to provide further conceptual input and to open global citizenship agendas to diversity and indigeneity Social and political changes brought by globalisation migration and technological advances of the 21st century have generated a rise in the popularity of the utopian and philosophical idea of global citizenship In response to the challenges of today s globalised and interconnected world such as inequality human rights violations and poverty global citizenship education has been invoked as a means of preparing youth for an inclusive and sustainable world In recent years the development of global citizenship education and the building of students global citizenship competencies have become a focal point in global agendas for education international educational assessments and international organisations However the concept of global citizenship education still remains highly contested and subject to multiple interpretations and its operationalisation in national educational policies proves to be challenging This volume aims to contribute to the debate question the relevancy of global citizenship education s policy objectives and to enhance understanding of local perspectives ideologies conceptions and issues related to citizenship education on a local national and global level To this end the book provides a comprehensive and geographically based overview of the challenges citizenship education faces in a rapidly changing global world through the lens of diversity and inclusiveness Women with Visible and Invisible Disabilities Martha Banks, Ellyn Kaschak, 2014-01-14 This thoughtful collection addresses the issues faced by women with disabilities examines the social construction of disability and makes suggestions for the development and modification of culturally relevant therapy to meet the needs of disabled women Written in an accessible style with a minimum of jargon this book provides clinical material from the perspectives of psychotherapists clients personal assistants and health administrators Women with Visible and Invisible Disabilities also highlights the importance of considering age ethnicity and sexual orientation in its examination of feminist approaches to assessment psychotherapy disability management coping and discusses how the Americans with Disabilities Act impacts employment and education for women Patenting of Pharmaceuticals and Development in Sub-Saharan Africa POKU ADUSEI, 2012-10-25 This book critically investigates the patent protection of medication in light of the threats posed by HIV AIDS malaria and tuberculosis epidemics to the citizens of countries in Sub Saharan Africa hereinafter SSA or Africa The book outlines the systemic problems associated with the prevailing globalized patent regime and the regime s inability to promote access to life saving medication at affordable prices in SSA It argues that for pharmaceutical patents to retain their relevance in SSA countries human development concepts must be integrated into global patent law and policy making An integrative approach implies developing additional public health and human development exceptions limitations to the

exercise of patent rights with the goal of scaling up access to medication that can treat epidemics in SSA By drawing on multiple perspectives of laws institutions practices and politics the book suggests that SSA countries adopt an evidence based approach to implementing global patent standards in domestic jurisdictions This evidence based approach would include mechanisms like local need assessments and the use of empirical data to shape domestic patent law making endeavors The approach also implies revising patent rules and policies with a pro poor and pro health emphasis so that medication will be more affordable and accessible to the citizens of SSA countries It also suggests considering the opinions of individuals and pro access institutions in enacting crucial pieces of health related statutes in SSA countries The approach in this book is sensitive to the public health needs of the citizens affected by epidemics and to the imperative of building local manufacturing facilities for pharmaceutical research and development in SSA
