PC Mag ,1993-05-25 PCMag com is a leading authority on technology delivering Labs based independent reviews of the latest products and services Our expert industry analysis and practical solutions help you make better buying decisions and get more from technology **Information Media & Technology** ,1991 *Sound & Communications* ,1992 **Maximum PC** ,2001-09 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave **PC Magazine** ,2000 *Maximum PC* ,2001-03 Maximum PC is the magazine that every computer fanatic PC gamer or content creator must read Each and every issue is packed with punishing product reviews insightful and innovative how to stories and the illuminating technical articles that enthusiasts crave **Diagnostic and Interventional Catheterization in Congenital Heart Disease** James E. Lock,2013-04-17 Cardiac catheterization has long been a central diagnostic modality in the evaluation of children adolescents and adults with congenital heart disease and in children with acquired heart disease Over the past two decades transcatheter interventions have become equally important in the treatment of pediatric and congenital heart disease Some transcatheter therapies have become established as the standard of care for congenital cardiovascular anomalies previously managed surgically others serve to supplement surgery in the integrated management of complex lesions and still others are in their infancy as pediatric interventional cardiology continues to advance in step with the broader field of pediatric cardiovascular medicine Since the previous edition of this book new technologies and techniques have been introduced to the field of pediatric interventional cardiology much has been learned about established transcatheter therapies and there has been a substantial increase in the volume of published data on outcomes of transcatheter procedures in congenital and pediatric heart disease With increasing experience the role of interventional catheterization has become solidified as an integral component of the comprehensive management of patients with essentially all forms of congenital heart disease Cardiac catheterization has also become established as a distinct subspecialty within the discipline of pediatric cardiology and at many centers has become the purview of cardiologists who have received specialized training in interventional catheterization and whose practice is focused on catheterization This book is targeted to trainees and established interventional cardiologists alike and is intended as a comprehensive reference for the clinical practice of diagnostic and interventional cardiology in pediatric and congenital heart disease In the organization of this book a combination of procedure based and problem based approaches has been employed The structure of the book has been updated to make it more reader friendly chapters have been added to address new techniques and problems in the field and greater emphasis has been placed on evaluation of outcomes of transcatheter interventions in congenital heart disease Section 1 covers the fundamentals of cardiac catheterization with chapters devoted to pre procedure patient evaluation sedation and anesthesia vascular access and related issues catheterization equipment and its

use hemodynamic evaluation angiography radiation and radiation safety and echocardiography in the catheterization lab
 Sections 2 through 4 include procedure based chapters that are organized according to the technical type of intervention
 Section 2 is devoted to transcatheter interventions for obstructive lesions including valvar stenoses and vascular obstructions
 Section 3 includes chapters that cover interventions to close various pathologic intracardiac communications and vascular anomalies
 Section 4 includes chapters covering interventions performed to create or enlarge intracardiac communications as well as other interventions
 Section 5 focuses on the applications of catheterization and transcatheter interventions in the evaluation and management of specific patient populations This problem based or patient based focus which is substantially expanded from the previous edition of the book reflects the expanding role of catheterization in the comprehensive management of pediatric and congenital heart disease and addresses emerging applications of transcatheter interventions including management of the patient receiving extracorporeal circulatory support hybrid transcatheter surgical interventions and prenatal cardiac intervention
 Section 6 includes two chapters that cover outcome assessment and regulatory issues pertinent to the pediatric cardiology in general and interventional cardiology in particular *Maximum PC* ,2001-01
