

Cell Communication

1. Review your prior assignment, and list four elements of the signal transduction system, from memory.

2. After you draw out the entire signal-transduction pathway, the water pipe breaks all the molecules and structures, identify which systems and molecules contribute to the transmission of the signal through the system in the signal?

3. Review Figure 15.20, and list four elements, from memory, working and a signal transduction and the components of the system. What is the major difference between the two systems in the diagram?
