#### Math Pacing Guide Las Cruces Public Schools

**Understanding Mathematics:** The standards define what students should understand and be able to do in their study of mathematics. Asking a student to understand something means asking a teacher to assess whether the student has understood it. "Mathematical understanding and procedural skill are equally important."

**Description of the Pacing Guide:** A pacing guide is an interval-based description of what teachers teach in a particular grade or course; the order in which it is taught, and the amount of time dedicated to teaching the content.

**Purpose of a Pacing Guide:** The purpose of a pacing guide is to ensure that all of the standards are addressed during the academic year. Each pacing guide is nine weeks in duration.

#### Components of the Pacing Guide:

- Critical Areas- Each grade level has identified Critical Areas. These areas are woven throughout the standards and should receive additional time and attention.
- Mathematical Practice Standards (8)- Based on the NCTM Process Standards, these standards describe the variety of "processes and proficiencies" students should master while working with the Grade Level Content Standards.
- Domains are larger groups of related Content Standards. Standards from different domains may sometimes be closely related."
- Clusters are groups of related standards. Note that standards from different clusters may sometimes be closely related, because mathematics is a connected subject."
- Grade level standards define what students should know and be able to do by the end of each grade level.
- Unpacked standards provide a clear picture for the teacher as he/she implements the CCSS.
- Resources—includes but not limited to current district core resources.
