Tourism, Planning, and Community Development Rhonda Phillips, Sherma Roberts,2013-09-13 The intersection of community development tourism and planning is a fascinating one Tourism has long been used as a development strategy in both developed and developing countries from the national to local levels These approaches have typically focused on economic dimensions with decisions about tourism investments policies and venues driven by these economic considerations More recently the conversation has shifted to include other aspects social and environmental to better reflect sustainable development concepts Perhaps most importantly is the richer focus on the inclusion of stakeholders An inclusionary

participatory approach is an essential ingredient of community development and this brings both fields even closer together It reflects an approach aimed at building on strengths in communities and fostering social capacity and capital In this book the dimensions of the role tourism plays in community development are explored A panoply of perspectives are presented tackling such questions as can tourism heal How can tourism development serve as a catalyst to overcome social injustices and cultural divides This book was originally published as a special issue of Community Development

Inclusive Community Development Through Tourism and Hospitality Practices Nadda, Vipin, Gonzo, Faithfull, Batta, Ravinder, Sharma, Amit,2023-04-24 Sustainable tourism should not be limited to environmental preservation the sociocultural and economic

sides should also be considered There is a need for an integrated approach recognizing the resources facilities and infrastructures that are interrelated with the social cultural and natural environment Community development becomes a reality only by merging the principles of sustainability with growth objectives Even though investments in environmentally friendly infrastructure and related services are fundamental there is a need to address gender inequalities exploitation and commercialization of culture Further there is a need to prioritize the link between tourism and poverty reduction Inclusive Community Development Through Tourism and Hospitality Practices explores various viable strategies for the adoption of

sustainable approaches that can eventually boost economic growth and poverty reduction all over the world Covering topics such as international tourism sustainable development and tourism reinforcement this premier reference source is an excellent resource for business leaders and managers students and educators of higher education community leaders government officials librarians researchers and academicians **Community Development** Erin Sharpe, Heather Mair, Felice Yuen, 2016-05-31 This book takes up a range of factors affecting the relationship between community development and recreation planning assumptions and structures class and racial influences on engagement processes grassroots approaches critical consciousness through young adult literature questions about the relationship between community and economic development and issues of inclusion social justice and community empowerment In a world of diversity and fluidity the challenge for leisure recreation practitioners and scholars becomes more complex and potentially exciting if we can become comfortable with uncertainty and ambiguity The term community development in a globalized and diverse world is problematic and carries with it a history of colonialism Western expansion and hegemony and neo liberal agendas in addition to being situated in a changing contentious world with nation states and minority groups struggling over control This volume initiates a discussion about the ways leisure sport and tourism might conceptualize the relationship with community development The volume builds upon existing research and programs extends or reframes theoretical approaches questions and posits alternative frameworks for playing with the intersection of community development leisure sport and tourism Its strength and relevance comes from the authors willingness to seriously and playfully explore the limits implications and variations of community development relevant for recreation and leisure studies as well as construct alternative spaces for leisure practices Whether it is reconceiving planning as a human arena potentially facilitating how an individual comes to understand the self and communities an exploration of how whiteness and privilege colour community development and recreation conceiving of a compassionate pedagogy for community and recreation facilitation or returning to young adult literature and storytelling for knowledge this collection interweaves current theories ethical frameworks practices and critiques relevant to recreation and leisure practitioners and scholars Such a collection helps orient leisure practice and scholarship within larger international and North American currents of diversity struggles over Indigenous rights and standing economic and global agendas political agendas that use leisure as power over or exclusion of others the value of leisure beyond social and economic benefits and the hegemonic commitment to an autonomous self initiating individual self As the voices herein unfold spaces within dominant and status quo approaches in governments and academia there are some voices yet to be heard **Event Tourism and Sustainable Community Development** Ekta Dhariwal, Shruti Arora, Anukrati Sharma, Azizul Hassan, 2023-10-27 The event tourism business has become more and more essential to community development in countries around the world helping to increase the appeal of specific destinations and generating huge economic benefits for the communities of the destinations impacting local economies With examples from India Sri

Wanda George, Heather Mair, Donald G. Reid, 2009-03-18 Rural tourism represents a merging of perhaps two of the most influential yet contradictory features of modern life Not only are the forces of economic social cultural environmental and political change working to redefine rural spaces the world over but broad global transformations in consumption and transportation patterns are reshaping leisure behaviour and travel For those concerned with both the nature of change in rural areas and tourism development the dynamics and impacts of integrating these two dramatic shifts are not well known but yet are becoming increasingly provocative discourses for study This book links changes at the local rural community level to broader more structural considerations of globalization and allows for a deeper more theoretically sophisticated consideration of the various forces and features of rural tourism development While Canadian in content the cases and discussions presented in this book can be considered generally relevant to any rural region continentally and globally that has undertaken or is considering rural tourism development

Community Development Erin K. Sharpe, Heather Mair, Felice Yuen, 2016 *Community Development Applications for Leisure Sport and Tourism* takes up a range of factors affecting the relationship between community development and recreation planning assumptions and structures class and racial influences on engagement processes grassroots approaches critical consciousness through young adult literature questions about the relationship between community and economic development and issues of inclusion social justice and community empowerment This book initiates a discussion about the ways leisure sport and tourism might conceptualize the relationship with community development It builds upon existing research and programs extends or reframes theoretical approaches questions and posits alternative frameworks for playing with the intersection of community development leisure sport and tourism while interweaving current theories ethical frameworks practices and critiques relevant to recreation and leisure practitioners and scholars Publisher s website

The Role of Arts & Culture in Community Development Iowa Cultural Caucus,1997 **Change Through Tourism** Minsun Doh,2010

Many view tourism as a tool for community development Especially in the rural areas experiencing economic hardships tourism often is considered an instrument for revitalization of a local economy helping to improve quality of life and protect natural and cultural resources However many researchers have raised concerns about an overly optimistic view by asserting that tourism development inevitably affects the corresponding community Empirical studies suggest that development of tourism brings environmental sociocultural and economic changes to the community where it is developed Thus it is important that planners look at the attitudes of local people towards tourism development in their community before an actual development takes place The conceptual basis of this study is development and change theory and empirical findings of tourism impact research This study provides information to assist in understanding questions related to the rural communities tourism planning process in a development context and residents perceptions of the impact of tourism and its further development A self administered mail back survey was administered to see how the residents of Brewster County Texas perceive tourism development in the region Considering the 43% of the Hispanic population in the area both English and Spanish versions of the questionnaires were sent to the possible respondents The overall response rate was 37% after two rounds of survey administered during January and February of 2006 The structural model confirmed that people's value orientation regarding nature was an important variable that explained residents community attachment which influenced their attitudes toward tourism through attitudes toward local participation The results indicated that residents values were oriented toward nature and that they were highly attached to their communities In addition their tourism attitudes were varied based on the types of tourism impacts they were expecting Although they were supportive of tourism related development they felt that certain types of tourism

development were more appropriate for their community Specifically medium impact tourism development were perceived to be desirable for the northern part of the region whereas low impact development options were perceived to be more acceptable for the southern part of the region by their residents

Tourism in Destination Communities

Shalini Singh,Dallen J. Timothy,Ross Kingston

Dowling,2003 Annotation As a result of the ongoing growth in the tourism industry many destinations around the world are

undergoing transformations New destinations are being discovered in regions previously ignored as people search for

regions that are yet unspoiled by the ravages of mass tourism At the same time traditional destinations are experiencing

rapid environmental socio cultural and economic modifications These changes have the most effect on the destination

community the location where tourists spend their time and money and influence development or degradation of the local environment Tourism in Destination Communities describes both the positive and negative effects of tourism on the destination community The chapters are divided into three sections which address the relationship between tourism and the destination community the various impacts of tourism on the destination community and the challenges and opportunities for destination communities Each chapter contains brief case studies and empirical examples
