

# Classification of Madness

## 1. Madness in Medieval

It was often associated with religious beliefs and was viewed as a punishment from God for sin or as a sign of demonic possession.

### Role of Leprosy

- Leprosy can cause physical disfigurement, particularly in the face, hands, and feet, which can lead to negative attitudes and discrimination from others.
- Therefore, people with leprosy were often segregated from the rest of society and confined to leper colonies or asylums.
- This isolation and mistreatment could have contributed to psychological problems such as depression, anxiety, and even psychotic disorders.

# Classifying Madness Classifying Madness

**Mary Ann Jimenez**

## **Classifying Madness**

*Classifying Madness* Rachel Cooper, 2005-04-22 This book is about the Diagnostic and Statistical Manual of Mental Disorders more commonly known as the D S M The D S M is published by the American Psychiatric Association and aims to list and describe all mental disorders Within its pages can be found diagnostic criteria for types of depression types of schizophrenia eating disorders anxiety disorders phobias sleeping disorders and so on Also included are less familiar and more controversial conditions Mathematics Disorder Caffeine Intoxication Nicotine Dependence Nightmare Disorder It must be admitted that the D S M is not an exciting read Its pages follow a standard format Each disorder has a numerical code This is followed by a description of the disorder which includes information regarding prevalence course and differential diagnosis Finally explicit criteria that patients must meet to receive the diagnosis are listed These generally include lists of the symptoms that must be present restrictions as to the length of time that the symptoms must have been troublesome and clauses that state that the symptoms must not be better accounted for by some other condition [Classifying Madness](#)

Rachel Valerie Cooper, University of Cambridge, 2002 **Classifying Madness** Joske Luis Rodrkiguez, University of Cambridge, 2001 *Console and Classify* Jan Goldstein, 1990-11-30 [Console and Classify](#) Jan E. Goldstein, 2001 Since its publication in 1989 *Console and Classify* has become a classic work in the history of science and in French intellectual history Now with a new afterword this much cited and much discussed book gives readers the chance to revisit the rise of psychiatry in nineteenth century France the shape it took and why and its importance both then and in contemporary society Goldstein has raised our understanding of the politics of psychiatric professionalization on to a new plane Roy Porter Times Higher Education Supplement A n historiographical tour de force quite simply the most insightful work on the subject in English or any other language A work of distinctive originality It is written with lucidity and elegance even a certain confident scholarly panache that make it a pleasure to read Toby Gelfand Social History Exhaustively researched elegantly written and persuasively argued *Console and Classify* is an excellent example of the sociologically informed intellectual history stimulated by Kuhn and Foucault Robert Alun Jones American Journal of Sociology **Classify and Label** Matt L. Drabek, 2014-10-15 *Classify and Label* The Unintended Marginalization of Social Groups is a philosophical treatment of classification in the social sciences and everyday life focusing on moral social and political implications The use of labels is essential to how people navigate and understand the world Classifications and labels also have a dark side as they may unintentionally misrepresent groups and individuals These misrepresentations disrupt how people think about themselves and how they treat others sometimes leading to marginalization Matt L Drabek analyzes classification by considering rich case studies across a variety of domains including the classification of gender and sexual orientation the psychiatric classification of sadomasochism and gender disorders and the classification of people in everyday life through the production of pornography and use of gender identities This broad sample reveals deep connections between the classifications

proposed by social scientists and the classifications used by society at large Drabek explores how classifications evolve from and eventually affect such seemingly disconnected issues as the situation of under represented groups in academia new models of parenting and the family the nature of sexual orientation and the nature of scientific bias

**The Routledge History of Madness and Mental Health** Greg Eghigian, 2017-04-07 This volume explores the history and historiography of madness from the ancient and medieval worlds to the present day Covering Africa Asia and South America as well as Europe and North America chapters discuss broad topics such as the representation of madness in literature and the visual arts the material culture of madness madness within life histories and the increased globalization of knowledge and treatment practices Chronologically and geographically wide ranging and providing a fascinating overview of the current state of the field this is essential reading for all students of the history of madness mental health psychiatry and medicine

**Psychology of Fear, Crime and the Media** Derek Chadee, 2015-12-07 The media continue to have a significant persuasive influence on the public perception of crime even when the information presented is not reflective of the crime rate or actual crime itself There have been numerous theoretical studies on fear of crime in the media but few have considered this from a social psychological perspective As new media outlets emerge and public dependence on them increases the need for such awareness has never been greater This volume lays the foundation for understanding fear of crime from a social psychological perspective in a way that has not yet been systematically presented to the academic world This volume brings together an international team of experts and scholars to assess the role of fear and the media in everyday life Chapters take a multidisciplinary approach to psychology sociology and criminology and explore such topics as dual process theory construal level theory public fascination with gangs and other contemporary issues

*Philosophical Issues in Psychiatry II* Kenneth S. Kendler, Josef Parnas, 2012-04-19 Psychiatric and psychological practice and research is critically dependent on diagnosis Yet the nature of psychiatric diagnosis and the rules by which disorders should be created and organized have been highly controversial for over 100 years Unlike simple medical disorders like infectious diseases psychiatric disorders cannot be traced to one simple etiologic agent The last two generations have seen major conceptual shifts in the approach to diagnosis with the rise of operationalized criteria and an emphasis on a descriptive rather than etiological approach to diagnosis The interest in psychiatric diagnoses is particularly heightened now because both of the major psychiatric classifications in the world DSM and ICD are now undergoing major revisions What makes psychiatric nosology so interesting is that it sits at the intersection of philosophy empirical psychiatric psychological research measurement theory historical tradition and policy This makes the field fertile for a conceptual analysis This book brings together established experts in the wide range of disciplines that have an interest in psychiatric nosology The contributors include philosophers psychologists psychiatrists historians and representatives of the efforts of DSM III DSM IV and DSM V Some of the questions addressed include i what is the nature of psychiatric illness Can it be clearly defined and if so how ii What is the impact of

facts versus values in psychiatric classification iii How have concepts of psychiatric diagnosis changed over time iv How can we best conceptualize the central idea of diagnostic validity And v Can psychiatric classification be a cumulative enterprise seeking improvements at each iteration of the diagnostic manual Each individual chapter is introduced by the editors and is followed by a commentary resulting in a dynamic discussion about the nature of psychiatric disorders This book will be valuable for psychiatrists psychologists and other mental health trainees and professionals with an interest in the questions and problems of psychiatric diagnosis as well as philosophers and philosophy students interested in the problems posed by psychiatry particularly those working in the philosophy of science *Taylor's Principles and Practice of Medical Jurisprudence* Frederick John Smith,1920

**Citizenship after Orientalism** Engin Isin,2016-04-29 This edited volume presents a critique of citizenship as exclusively and even originally a European or Western institution It explores the ways in which we may begin to think differently about citizenship as political subjectivity **The Yale Literary Magazine** ,1913

**Changing Faces of Madness** Mary Ann Jimenez,1987 By tracing changing responses to insanity in Massachusetts the author provides new insights into the evolution of early American culture **Being Human** Alastair Morgan,2008 Attempts to shed fresh light on the intersections between mental health mental distress and society This work provides a statement of the importance of thinking through the humanities for any non reductive understanding of the meaning of mental distress and gives insights on a range of problems **Key Concepts in Mental Health** David Pilgrim,2005-05-20 Mental health is an area of study which is often bewildering to new students and trainee practitioners This book provides a guide to the key topics and debates which shape contemporary views about mental health and illness and which govern the provision of services for people with mental health problems **Hebrew University Issue, March Twenty-seven, Nineteen Hundred Twenty-five** ,1925

**Antipsychiatry** Thomas Szasz,2009-09-08 More than fifty years ago Thomas Szasz showed that the concept of mental illness a disease of the mind is an oxymoron a metaphor a myth Disease in the medical sense affects only the body He also demonstrated that civil commitment and the insanity defense the paradigmatic practices of psychiatry are incompatible with the political values of personal responsibility and individual liberty The psychiatric establishment's rejection of Szasz's critique posed no danger to his work its defense of coercions and excuses as therapy supported his argument regarding the metaphorical nature of mental illness and the transparent immorality of brutal psychiatric control masquerading as humane medical care In the late 1960s the launching of the so called antipsychiatry movement vitiated Szasz's effort to present a precisely formulated conceptual and political critique of the medical identity of psychiatry Led by the Scottish psychiatrist R D Laing the antipsychiatrists used the term to attract attention to themselves and to deflect attention from what they did which included coercions and excuses based on psychiatric principles and power For this reason Szasz rejected and continues to reject psychiatry and antipsychiatry with equal vigor Subsuming his work under the rubric of antipsychiatry betrays and negates it just as surely and effectively as subsuming it under the rubric of psychiatry In

Antipsychiatry Quackery Squared Szasz powerfully argues that his writings belong to neither psychiatry nor antipsychiatry  
They stem from conceptual analysis social political criticism and common sense     *The Undirected Society* Sir Geoffrey  
Vickers, 1959     **Canadian Psychiatric Association Journal** Canadian Psychiatric Association, 1977     English Studies in  
Canada ,1998
