Ahe, 2009-02-01 *Managing Conduct and Data Quality of Toxicology Studies* B. Kristine Hoover, 1986 *International Service Learning* Robert G. Bringle, Julie A. Hatcher, Steven G. Jones, 2023-07-03. International Service Learning (ISL) borrows from the domains of service learning, study abroad, and international education to create a new pedagogy that adds new and unique value from this combination. It is a high impact pedagogy with the potential to improve students' academic attainment, contribute to their personal growth, and develop global civic outcomes. The international service experience provides opportunities for additional learning goals, activities, and relationships that are not available in a domestic service learning course or in a traditional study abroad course. The service experience develops reflection while shedding light on and providing an added dimension to the curricular component of the study abroad course. The international education component further broadens students' perspectives by providing opportunities to compare and contrast North American and international perspectives on course content. This book focuses on conducting research on ISL, which includes developing and evaluating hypotheses about ISL outcomes and measuring its impact on students, faculty, and communities. The book argues that rigorous research is essential to improving the quality of ISL's implementation and delivery and providing the evidence that will lead to wider support and adoption by the academy, funders, and partners. It is intended for both practitioners and scholars, providing guidance and commentary on good practice. The volume provides a pioneering analysis of and understanding of why and under what conditions ISL is an effective pedagogy. Individual chapters discuss conceptual frameworks, research design issues, and measurement strategies related to student learning outcomes, the importance of ISL,

course and program design the need for faculty development activities to familiarize faculty with the component pedagogical strategies the need for resources and collaboration across campus units to develop institutional capacity for ISL and the role that community constituencies should assume as co creators of the curriculum co educators in the delivery of the curriculum and co investigators in the evaluation of and study of ISL The contributors demonstrate sensitivity to ethical implications of ISL to issues of power and privilege to the integrity of partnerships to reflection reciprocity and community benefits
