Computer Recognition Systems Marek Kurzynski, Edward Puchala, Michal Wozniak, Andrzej Zolnierrek, 2007-12-13
This book contains papers accepted for presentation at the 4 International Conference on Computer Recognition Systems CORES 05 May 22-25 2005 Rydzyna Castle Poland. This conference is a continuation of a series of conferences on similar topics KOSYR organized each second year since 1999 by the Chair of Systems and Computer Networks Wroclaw University of Technology. An increasing interest to those conferences paid not only by home but also by foreign participants inspired the organizers to transform them into conferences of international range. Our expectations that the community of specialists in computer recognizing systems will find CORES 05 a proper form of maintaining the tradition of the former conferences have been confirmed by a large number of submitted papers. Alas organizational constraints caused a necessity to narrow the acceptance criteria so that only 100 papers have been finally included into the conference program. The area covered by accepted papers is still very large and it shows how vivacious is scientific activity in the domain of computer recognition methods and systems. It contains various theoretical approaches to the recognition problem based on mathematical statistics, fuzzy sets, morphological methods, wavelets, syntactic methods, genetic algorithms, artificial neural networks, ontological models etc. Most attention is still paid to visual objects recognition; however acoustic textual and other objects are also considered. Among application areas medical problems are in majority; recognition of faces, speech signals and textual information processing methods being also investigated.

Computer Recognition Systems 3 Marek Kurzynski, Michal Wozniak, 2009-05-12
This book presents latest results in computer recognition systems, pattern recognition, machine learning, web and data mining. It includes coverage of image processing and computer vision, speech and word recognition and medical applications.

Applications of Soft Computing Jörn Mehnen, Mario Köppen, Ashraf Saad, Ashutosh Tiwari, 2009-09-30
WSC2008 Chair's Welcome Message Dear Colleague The World Soft Computing WSC conference is an annual international online conference on applied and theoretical soft computing technology. This WSC 2008 is the thirteenth conference in this series and it has been a great success. We received a lot of excellent paper submissions which were peer reviewed by an international team of experts. Only 60 papers out of 111 submissions were selected for online publication. This assured a high quality standard for this online conference. The corresponding online statistics are a proof of the great world wide interest in the WSC 2008 conference. The conference website had a total of 33 367 different human user accesses from 43 countries with around 100 visitors every day. 151 people signed up to WSC to discuss their scientific disciplines in our chat rooms and the forum. Also audio and slide presentations allowed a detailed discussion of the papers. The submissions and discussions showed that there is a wide range of soft computing applications to date. The topics covered by the conference range from applied to theoretical aspects of fuzzy, neuro-fuzzy and rough sets over to neural networks to single and multi objective optimisation. Contributions about particle swarm optimisation, gene expression programming, clustering, classification, support vector machines.
