*Collective Bargaining and Wage Formation* Hannu Piekkola, Kenneth Snellman, 2009-09-03 Hannu Piekkola and Kenneth Snellman ETLA The Research Institute of the Finnish Economy Helsinki Finland The Labour Institute for Economic Research Helsinki Finland 1 The Basic Issues Wages have traditionally been agreed on collectively in Europe The articles in this volume examine the current state of collective bargaining as well as the challenges it is currently facing The issues examined in these papers have a wide applicability to problems on the European labour markets Torben M Andersen and Steinar Holden review challenges from globalisation and inter industry trade and the adaptation to a low inflation environment The other contributions are part of the project investigating collective bargaining in Finland carried out by ETLA the Research Institute of the Finnish Economy and the Labour Institute for Economic Research Some of them use results from a Finnish survey carried out by the two institutes ETLA and the Labour Institute on the views of employers and employees about labour relations and the labour market negotiation system Bargaining systems are complex and their future development depends on their historical evolution recent and past experiences and the current situation in the labour market as well as changes in the international environment By examining the past functioning of the bargaining system one can observe how different elements in it have interacted with various factors in the environment of the system

**Collective Bargaining and Wages in Comparative Perspective** Roger Blanpain, Thomas Blanke, Edgar Rose, Kerstin Ahlberg, 2005-01-01 Remarkably the core element of labour relations wage determination has been excluded from the European social dialogue about harmonisation of working conditions and national systems of social security The present study responds by analysing the prospects of building up

structures of wage formation in Europe through a reevaluation of collective bargaining and collective agreements as they exist under the law of the most industrialized Member States The impetus for the study is the widely debated crisis of the system of concluding regional collective agreements on wages Social partners seem to have been trapped in fruitless conflicts on how the system must be reformed It has become obvious that no party concerned employers trade unions the state has the capacity to resolve the growing difficulties of collective wage formation In an introductory essay by the distinguished editors this important study takes the situation in Germany the most prominent manifestation of this European crisis as its starting point Then academic experts from France the United Kingdom the Netherlands and Sweden describe comparable problems in their own countries detail approaches to dealing with them and provide a critical commentary including judgements and suggestions in relation to the German case Then follows a reexamination of the situation in Germany in the light of the experience of the other countries A final chapter outlines some preliminary interpretations of European prospects Salient issues investigated include the following the erosion of such ideological and legal categories and concepts as dependent work solidarity subsidiarity and social self regulation as preconditions of traditional collective bargaining structures at national level the decreasing membership of the bargaining partners on both sides the shrinking rate of employees covered by collective agreements attempts to establish a national social pact increasing competition on global markets decentralizing management strategies including the abandonment of collective bargaining and individualized employees The authors examine the various state structures to determine if the legal and institutional developments of the different national systems of collective bargaining constitute starting points for mutual learning in order to meet the new challenges This leads to a discussion of which practices are successful in their original environment and how these practices might adapt to other systems in other countries

**EMU Challenges European Labor Markets** Rüdiger Soltwedel, Dirk Dohse, Christiane Krieger-Boden, 1999-09-01 This paper discusses the challenges that European Monetary Union EMU poses for European labor markets emphasizing in particular the regional dimension of the European unemployment problem The authors argue that the inability of labor markets to adjust to shocks is largely a regional problem within EMU member countries requiring structural reforms to enhance labor market flexibility but also a decentralization of competencies and greater diversity of labor market outcomes Any attempt to successfully reform European labor markets and make them fit for EMU has to take into account the regional and even a more decentralized firm perspective

**Kansantaloudellinen aikakauskirja**, 2005 **Challenging Neighbours** CPB Netherlands Bureau for Economic Policy Analysis, 2012-12-06

Challenging Neighbours provides wide coverage of the German and Dutch economies from an institutional point of view Pensions competition policy labour relations corporate governance and health care are among the topics for which the institutional setting and performance of Germany and the Netherlands are compared The difficulties and successes the countries have in facing pressures from aging population developments in technology and global competition are traced back

to their institutional roots and lead to mutual lessons for institutional reform for German and Dutch policy makers

*Economics, Politics and Social Issues in Latin America* Mary P. Lassiter, 2007 Latin America is a diverse group countries with extremely diverse economies and political dynamics Some are heavy in poverty and others are booming with petrodollars They speak Spanish Portuguese and French This book brings together analyses detailing crucial issues at the beginning of the 21st century     The Challenge Of Globalization And Institution Building Randall W. Kindley, David F Good, 2019-07-11 Describing and analyzing the links between monetary policy and economic governance in small countries in both Western and Eastern Europe this interdisciplinary volume demonstrates how interest groups shape monetary policy decisions in increasingly globalized financial markets The contributors findings hold great relevance even for large countries like the United States which are now struggling with the challenges of internationalization A diverse group of political scientists and economists the contributors contend that although the small states have limited options they are nonetheless able to make choices that enable their export industries to flourish in an environment of increasing internationalization The authors conclude that lack of control over the future shape of monetary union in Europe is not inimical to future prosperity

*Belgium: Selected Issues* International Monetary Fund, 1998-09-05 In recent years the IMF has released a growing number of reports and other documents covering economic and financial developments and trends in member countries Each report prepared by a staff team after discussions with government officials is published at the option of the member country
