In 2006 we published College Physics A Strategic Approach a new algebra based physics textbook for students majoring in the biological and life sciences, architecture, natural resources and other disciplines. As the first such book built from the ground up on research into how students can more effectively learn physics, it quickly gained widespread critical acclaim from professors and students alike. For this fourth edition we have continued to build on the research proven instructional techniques introduced in the first edition while working to make the book more useful for instructors, more relevant to the students who use it, and more connected to the other subjects they study. Student Workbook for College Physics, a Strategic Approach Randall D. Knight, Randall Dewey Knight, Brian Jones, James H. Andrews, Stuart Field, 2010. These popular and proven workbooks help students build confidence before attempting end of chapter problems. They provide short problems and exercises that focus on developing a particular skill, often requiring students to draw or interpret sketches and graphs or reason with math relationships. New to the Second Edition are exercises that provide guided practice for the textbook's Problem Solving Strategies, focusing in particular on working symbolically.
