**Dark Pools** Scott Patterson, 2012 Evaluates the cost and consequences of high speed trading arguing that the development of automatic super intelligent trading machines is eliminating necessary human interests and compromising regulation measures

**Dark Pools** Scott Patterson, 2013-06-25 A news breaking account of the global stock market's subterranean battles Dark Pools portrays the rise of the bots artificially intelligent systems that execute trades in milliseconds and use the cover of darkness to out maneuver the humans who've created them In the beginning was Josh Levine an idealistic programming genius who dreamed of wresting control of the market from the big exchanges that again and again gave the giant institutions an advantage over the little guy Levine created a computerized trading hub named Island where small traders swapped stocks and over time his invention morphed into a global electronic stock market that sent trillions in capital through a vast jungle of fiber optic cables By then the market that Levine had sought to fix had turned upside down birthing secretive exchanges called dark pools and a new species of trading machines that could think and that seemed ominously to be slipping the control of their human masters Dark Pools is the fascinating story of how global markets have been hijacked by trading robots many so self directed that humans can't predict what they'll do next

**The Quants** Scott Patterson, 2010-02-02 With the immediacy of today's NASDAQ close and the timeless power of a Greek tragedy The Quants is at once a masterpiece of explanatory journalism a

gripping tale of ambition and hubris and an ominous warning about Wall Street's future. In March of 2006 four of the world's richest men sipped champagne in an opulent New York hotel. They were preparing to compete in a poker tournament with million dollar stakes but those numbers meant nothing to them. They were accustomed to risking billions. On that night these four men and their cohorts were the new kings of Wall Street. Muller, Griffin, Asness and Weinstein were among the best and brightest of a new breed, the quants. Over the prior twenty years this species of math whiz technocrats who make billions not with gut calls or fundamental analysis but with formulas and high speed computers had usurped the testosterone fueled kill or be killed risk takers who'd long been the alpha males of the world's largest casino. The quants helped create a digitized money trading machine that could shift billions around the globe with the click of a mouse. Few realized though that in creating this unprecedented machine men like Muller, Griffin, Asness and Weinstein had sowed the seeds for history's greatest financial disaster. Drawing on unprecedented access to these four number crunching titans, *The Quants* tells the inside story of what they thought and felt in the days and weeks when they helplessly watched much of their net worth vaporize and wondered just how their mind bending formulas and genius level IQ's had led them so wrong so fast.

*International Investment Management* Kara Tan Bhala, Warren Yeh, Raj Bhala, 2016-04-14. *International Investment Management: Theory, Practice and Ethics* synthesizes investment principles, Asian financial practice and ethics reflecting the realities of modern international finance. These topics are studied within the Asian context first through the medium of case studies and then via the particular conditions common in those markets including issues of religion and philosophy. This book has a three part structure beginning with the core principles behind the business of investments including securities analysis, asset allocation and a comprehensive analysis of modern finance theory. This gives students a comprehensive understanding of investment management by going through the theories, ethics and practice of investment management. This text provides a detailed overview of International Banking Law and International Securities Regulation alongside legal and ethics case studies which are located in the practice section of the book. This book is an essential text for business and law school students who wish to have a thorough understanding of investment management. It is also perfect as a core text for undergraduate finance majors and graduate business students pursuing a finance and/or business ethics concentration with particular focus on Asia.

The Wall Street Poker Night Tournament was held on March 8, 2006. More than a hundred well-heeled players attended the event, including elite traders and buttoned-down dealmakers. The small private affair was a gathering of a select group of wealthy and brilliant individuals. 2. By the early 2000s, quants had come to dominate Wall Street, using brain-twisting math to pluck billions in fleeting dollars out of the market. They couldn't care less about a company's fundamentals. 3. The quants ran a private poker game, but traditional investment titans joined in. Carl Icahn, the billionaire financier who'd gotten his start on Wall Street with 4,000 in poker winnings, was a regular.

4 The players got down to business A melodic chime summoned stragglers into the main room where vested dealers waited behind scattered rows of card tables The game was Texas Hold em The action was cordial on the surface but cutthroat between the lines

*Chaos Kings* Scott Patterson, 2023-06-06 Written by a veteran Wall Street Journal reporter this is a fascinating and closely observed chronicle of the storm chasing edgelords of finance and the critics with whom they clash The New York Times the billion dollar traders and crisis predictors who strive to turn extreme events into financial windfalls There s no doubt that our world has gotten more extreme Pandemics climate change superpower rivalries cyberattacks political radicalization virtually everywhere we look there is mayhem bearing down on us putting trillions of assets at risk And at least two factions have formed around how to respond In *Chaos Kings* Scott Patterson depicts how one faction led by Nassim Nicholas Taleb bestselling author of *The Black Swan* believes humans can never see the big disaster coming In their view extreme events so called Black Swans while inevitable will always catch us by surprise In 2007 Taleb s longtime collaborator Mark Spitznagel launched the Universa hedge fund which would go on to make billions protecting investors against unforeseen chaos in the market A second faction which relies on complex formulas believes looming chaos can be detected Chief among these risk prognosticators is Didier Sornette a colorful French mathematician who enjoys riding his motorcycle at speeds in excess of 170 miles per hour When Sornette looks out from what he calls his Financial Crisis Observatory in Zurich Switzerland what he sees are Dragon Kings punishing events that are unlikely to occur but have probabilities that can be predicted and defended against Which faction is right All of our financial futures may depend on the answer Detailed yet accessible this will appeal to fans of Michael Lewis s *The Big Short* Publishers Weekly
