**Philosophy and Foundations of Mathematics** A. Heyting, 2014-05-12 L E J Brouwer Collected Works Volume 1  
Philosophy and Foundations of Mathematics focuses on the principles operations and approaches promoted by Brouwer in studying the philosophy and foundations of mathematics. The publication first ponders on the construction of mathematics. Topics include arithmetic of integers negative numbers measurable continuum irrational numbers Cartesian geometry similarity group characterization of the linear system of the Cartesian or Euclidean and hyperbolic space and non-Archimedean uniform groups on the one dimensional continuum. The book then examines mathematics and experience and mathematics and logic. Topics include denumerably unfinished sets continuum problem logic of relations consistency proofs for formal systems independent of their interpretation infinite numbers and problems of space and time. The text is a valuable reference for students mathematicians and researchers interested in the contributions of Brouwer in the studies on the philosophy and foundations of mathematics.

**Elements of the German Language** ... Elias Peissner, 1855 , *The Interfaces* Kerstin Schwabe, Susanne Winkler, 2003-03-20  
The Interfaces Deriving and Interpreting Omitted Structures is a collection of never before published papers that explore the nature of the interfaces of syntax with semantics phonology and discourse. The papers investigate the various ways in which elliptical structures are related to these interfaces. As such they not only make a valuable contribution to generative linguistic research but more generally help to deepen our understanding of the relation between form and meaning in natural language. In the book's introductory chapter the editors address general issues related to current work on ellipsis and the syntax semantics syntax phonology and syntax discourse interfaces. The rest of the book is organized into three parts. The first examines PF deletion accounts of elliptical structures the second investigates these structures from the perspective of the syntax semantic interface and the third explores these from a perspective that concentrates on the relation between semantics and focus and discourse structure. Together the papers collected in this volume offer a convincing demonstration of the value of collaborative research on the interfaces.
