**How to Ace the Brainteaser Interview** John Kador,2004-08-23 As if job interviews weren't intimidating enough a number of the most desirable companies are raising the ante Instead of Tell us about yourself or What is your biggest weakness applicants are confronted by challenges such as Why are beer cans tapered on the ends How many piano tuners are there in the world How many ping pong balls can you stuff into a Boeing 747 Design a bathroom for the CEO of the company If you could remove any one of the 50 US states which would you select and why What are the interviewers looking for In general they want insights into how you think and how creative you are Can you articulate a problem in a creative way Can you shift your point of view so you think outside the box Can you outline a logical procedure for estimating an answer Can you defend the answer against objections Only by evaluating your responses will the interviewer be able to determine what sets you apart from the rest and perhaps more importantly how well you respond to unusual or unexpected business situations Acing such interviews requires a new mindset It's not about right and wrong The obvious answers are

generally the least desirable and generally wrong. Today success requires outrageous mental leaps, enormous confidence and taking risks. These are the challenges that the best companies use to separate the best from the good. Can you measure up and make the cut? This book will help you. This book is a how-to for job applicants who want to be prepared for a line of think on your feet creativity stumpers currently in vogue by a number of companies determined to select the best employees in today's incredibly competitive job market. A number of articles, books and broadcasts indicate that many employers in search of the Right Stuff are throwing out traditional questions in favor of problem solving queries. Their goal is to seek out talented individuals who are not only smart but can think on their feet. Kador takes an in-depth look at the variety of challenges an applicant can expect to be asked in addition to offering proven strategies for knocking them out of the park. The main part of the book will give readers the inside track on the most popular such questions and what interviewers are looking for. A section of the book will allow readers to test their creativity against a set of new brain teasers and off the wall questions.

**Human Resources for the Non-HR Manager** Carol T. Kulik, 2004-06-30. Human Resources for the Non-HR Manager appeals to anyone interested in management issues. The book explains why human resource issues are increasing the responsibilities of front line managers rather than the HR department. Chapters present the basics of HR including the fundamentals of hiring, performance appraisal, reward systems and disciplinary systems so that any manager, regardless of his or her background or functional area, can approach these parts of the job with confidence. The book also covers the latest developments in equal opportunity law and describes the manager's responsibilities in controlling sexual harassment and managing diverse employees including older workers and employees with disabilities. Each chapter's material is firmly grounded in the current HR academic literature but the book's friendly conversational tone conveys basic principles of good practice without technical jargon. Designed to make the material more accessible and personally relevant, the book includes the following special features: Manager's Checkpoints, a series of questions that help the reader apply the material to his or her own organizational context; Boxes that describe real life examples of how companies respond to HR challenges; For Further Reading, references to articles published in outlets that bridge the academic-practitioner divide; Manager's Knots, presented in a question and answer format, these describe typical managerial problems, take the reader into some of the gray, ambiguous areas of HR and suggest ways to apply the chapter material to real life managerial dilemmas.

**Recruiting, Interviewing, Selecting & Orienting New Employees** Diane Arthur, 2006.
