The Whole-School Community Read Margaux DelGuidice-Calemmo, Jeannette Balantic, 2025-10-30 A comprehensive resource for librarians and teachers who want to implement a whole school community reading program in their schools. Community reading programs can foster a love of reading, increase student engagement, build a community of readers, and simultaneously improve literacy. Yet it can be daunting to begin a new program at a busy school. This guidebook provides a clear roadmap for librarians and teachers who wish to try a whole school community reading program with all ages of learners. Beginning with a history of whole school reads, authors DelGuidice Calemmo and Balantic describe how a community reading program can work for students at all levels and promote family connections through reading. They offer advice on finding funding, building successful collaborations within the school community, and allowing students to have a voice in book selection. Marketing, makerspace, and promotion ideas help encourage participation. Learn how to use informal checkpoints and a final celebration to sustain and celebrate participants. Finally, come away with strategies to assess these programs and try variations to increase engagement. Appendixes of resources provide practical tools for those ready to begin planning their own program.

Globalization, Consumption And Popular Culture In East Asia Tai Wei Lim, Wen Xin Lim, Xiaojuan Ping, Katherine Hui-yi Tseng, 2016-09-02 This book aims to provide comprehensive empirical and theoretical studies of expanding fandom communities in East Asia through the commodification of Japanese, Korean, and Chinese popular cultures in the digital era. Using a multidisciplinary approach including political economy, East Asian studies, political science, international relations, concepts, and history, this book focuses on a few research objectives. In terms of methodology, it is an area studies approach based on interpretative work, observation studies, policy, and textual analysis. First, it aims to examine the closely intertwined relationship between the three major stakeholders in the iron triangle of production, companies, consumers, and states, i.e., the role of government in policy promotion. Second, it studies the interpenetration, adaptation, innovation, and hybridization of exogenous Western culture with traditional popular cultures in North East Asia. Third, it studies the influence of popular cultures and how cultural products resonate with a regional audience through collective consumption contents reflective of normative values, the emotive and cognitive appeal of familiar images, and social learning, as well as peer effect found in fan communities. It then examines how consumption contributes to soft cultural influence and how governments leverage on its comparative advantages and cultural assets for commercial success and in the process augment national cultural influence. These questions will be discussed and analyzed and contextualized through the case studies of J-pop, Japanese popular culture, K-pop, Korean popular culture, or Hallyu, and Chinese popular culture, including Mando pop and Taiwanese popular culture.

The Hidden Psychology of Social Networks: How Brands Create Authentic Engagement by Understanding What Motivates Us Joe Federer,2020-09-15 From the former Head of Brand Strategy at Reddit comes a proven and thought provoking approach to the digital economy and how brands can create authentic engagement that is rooted in the fundamental motivations behind human psychology. Leading marketing practitioner and thought leader Joe Federer draws on evolutionary biology, anthropology, neuroanatomy and psychology as well as more than a decade of hands on experience to explain why people act so differently in various online spaces and what they are seeking from participating in each one. With a framework based on Freud's Id, Ego and Superego model of the human psyche, he demonstrates how the internet is a digital reflection of the collective human psyche and how different social networks correspond to different mindsets. Platforms like Reddit to the unfiltered Id, Facebook and Twitter to the managed Ego and Instagram to the ideal Superego. In the same way you behave differently when you're home alone, out with friends, communicating with family or interacting with coworkers, people act and express themselves differently in these various online spaces. Context matters. Understanding this will enable you to develop and execute effective engagement strategies to reach your target audiences on each social network. Learn how to create content that drives sharing and word of mouth, how brands can fit natively into different types of social channels, how to balance branded social presences across different networks, why authenticity will only grow in importance to consumers. Fascinating and deeply compelling, *The Hidden Psychology of Social Networks* will equip you to make vastly more efficient use of your media buys, establish more thoughtful strategies, develop better creative and, in the end, deliver more effective marketing that provides value.
