Caribbean Inhospitability Natalie Lauren Belisle, 2025-02-14 The Caribbean has a global reputation for extending unparalleled hospitality to foreign guests Yet local citizens express feeling alienated from the Caribbean nations they call home Here Natalie Lauren Belisle probes the relationship between these incompatible narratives of Caribbean life Departing from tourist centered critiques of the Caribbean's visitor economy Belisle instead gives primacy to the political life of the Caribbean citizen subject within a broader hospitality regime Reading literary cinematic and digital texts that traverse the Spanish Anglophone and Francophone Caribbean Belisle interprets citizens estrangement through misdirected political deliberation and demonstrates that inhospitability is institutionalized through the aesthetic reproducing itself in the laws that condition belonging and membership in the nation state Ultimately Caribbean Inhospitability recasts the decay of nation state sovereignty in the postcolonial Caribbean within the contours of neoliberalism international relations and cosmopolitanism

The Cultural Imaginary of Terrorism in Public Discourse, Literature, and Film Michael Frank, 2017-06-14 This study investigates the overlaps between political discourse and literary and cinematic fiction arguing that both are informed by and contribute to the cultural imaginary of terrorism Whenever mass mediated acts of terrorism occur they tend to trigger a proliferation of threat scenarios not only in the realm of literature and film but also in the statements of policymakers security experts and journalists In the process the discursive boundary between the factual and the speculative can become difficult to discern To elucidate this phenomenon this book proposes that terror is a halfway house between the real and the imaginary For what characterizes terrorism is less the single act of violence than it is the fact that this act is perceived to be the beginning or part of a potential series and that further acts are expected to occur As turn of the century writers such as Stevenson and Conrad were the first to point out this gives terror a fantastical dimension a fact reinforced by the clandestine nature of both terrorist and counter terrorist operations Supported by contextual readings of selected texts and films from *The Dynamiter* and *The Secret Agent* through late Victorian science fiction to post 9 11 novels and cinema this study explores the complex interplay between actual incidents of political violence the surrounding discourse and fictional engagement with the issue to show how terrorism becomes an object of fantasy Drawing on research from a variety of disciplines *The Cultural Imaginary of Terrorism* will be a valuable resource for those with interests in the areas of Literature and Film Terrorism Studies Peace and Conflict Studies Trauma Studies and Cultural Studies

the human will *Young Adult Resources Today* Don Latham, Melissa Gross, 2014-05-21 *Young Adult Resources Today* Connecting Teens with Books Music Games Movies and More is the first comprehensive young adult library services textbook specifically written for today's multidimensional information landscape. The authors integrate a research focused information behavior approach with a literature focused resources approach and bring together in one volume key issues related to research theory and practice in the provision of information services to young adults. Currently no single book addresses both YA information behaviors and information resources in any detail; instead books tend to focus on one and give only cursory attention to the other. Key features of this revolutionary book include its success in integrating theory, research, and practice; integrating implications for practice throughout the book; integrating knowledge of resources with professional practice as informed by research; integrating both print and electronic formats throughout within the resource chapters including websites and social media. Latham and Gross accomplish all this while paying particular attention to the socially constructed nature of young adulthood, diversity, YA development, and multiple literacies. Their coverage of information landscapes covers literature with detailed coverage of both genres and subgenres, movies, magazines, web sites, social media, and gaming. The final chapter covers navigating information landscapes focusing on real and virtual YA spaces, readers advisory programming, and collaboration. Special attention is paid to program planning and evaluation. *Science-fiction Studies*, 2007 **Young Adult Science Fiction** Charles William Sullivan, 1999-03-30 At the close of the nineteenth century American youths developed a growing interest in electricity and its applications, machines, and gadgetry. When authors and publishers recognized the extent of this interest in technology, they sought to create reading materials that would meet this market need. The result was science fiction written especially for young adults. While critics tended to neglect young adult science fiction for decades, they gradually came to recognize its practical and cultural value. Science fiction inspired many young adults to study science and engineering and helped foster technological innovation. At the same time, these works also explored cultural and social concerns more commonly associated with serious literature. Nor was young adult science fiction a peculiarly American phenomenon; authors in other countries likewise wrote science fiction for young adult readers. This book examines young adult science fiction in the U.S. and several other countries and explores issues central to the genre. The first part of the book treats the larger contexts of young adult science fiction and includes chapters on its history and development. Included are discussions of science fiction for young adults in the U.S. and in Canada, Great Britain, Germany, and Australia. These chapters are written by expert contributors and chart the history of young adult science fiction from the nineteenth century to the present. The second section of the book considers topics of special interest to young adult science fiction. Some of the chapters look at particular forms and expressions of science fiction, such as films and comic books. Others treat particular topics, such as the portrayal of women in Robert Heinlein's works and representations of war in young adult science fiction. Yet another chapter studies the young adult science fiction novel as a coming of age story and thus helps

distinguish the genre from science fiction written for adult readers All chapters reflect current research and the volume concludes with extensive bibliographies "Who Goes There?"
