Summary of Andy Puddicombe's The Headspace Guide to Meditation and Mindfulness Everest Media, 2022-03-25T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The most common misconception about meditation is that it involves achieving a quiet empty mind through meditation which is a bubble in which there is nothing but space and through which nothing unpleasant can enter But meditation is actually about stopping thoughts and feelings 2 When you first sit down to meditate it can feel like you are caught in the middle of a traffic jam of thoughts But meditation does not make you think It simply shines a bright light on your mind so that you can see it more clearly 3 When we try to control everything we end up getting caught up in the rush hour traffic of our own minds When we step back and observe the thoughts and feelings there is a sense of increased space It might feel as if we are simply an observer watching the thoughts and feelings go by 4 The thoughts that pop into your mind when you sit down to meditate or when you are walking down the street are autonomous You didn't bring them to mind and yet they came to mind You can't control your thoughts but you can control how you respond to them

Mindfulness is the ability to be present in the present moment. It can help us become less swept away by our powerful habitual currents of thought and emotion, which can manifest as stress, depression, negative thinking, anxiety, anger, resentment, or self-doubt. 2. Mindfulness is a way of being that doesn't belong to any one culture or tradition. It is about teaching yourself to be more aware, present, focused, and accepting of yourself and others. 3. Mindfulness is the practice of being present in the present moment. It involves setting aside time for practice, and it can be done through the various objects of attention listed above. 4. The practice of mindfulness goes back thousands of years. It has been adapted for Westerners with jobs and families, and it has spread like wildfire in the public consciousness. *Creating Nonviolent Niches Within a Medium Security Prison for Women* Lila Rucker, 1991. **What is Mindfulness and why is it positive?** Dennis Paul, 2018-11-08. Essay from the year 2018 in the subject Psychology Miscellaneous, grade 10. University of Limerick, Physical Education and Sport Sciences, PESS department, course Applied Positive Psychology, language English, abstract. Mindfulness is becoming increasingly important during the emergence of digitalization and issues of addiction to the all-pervasive media on the one side, and increasing occupational workload and working hours on the other side. The application of mindfulness has gained much more popularity in the West in the past decades, which is generally contributed to Jon Kabat Zinn and his application of mindfulness in the clinical context. Also in the field of positive psychology, which is concerned with human well-being and flourishing, by focusing on positive experiences, traits, and virtues, concept and practice of mindfulness have been established as a focus of research regarding its potential for improving well-being.
