 Sarferaz, 2024-05-30 This book explains how to embed artificial intelligence in digitized business processes of ERP software  
 by solving the two related substantial challenges how can artificial intelligence be systematically integrated into ERP  
 business processes for ease of consumption and how can artificial intelligence be made enterprise ready by covering ERP  
 qualities like compliance lifecycle management extensibility or scalability As a general introduction the first part of this book  
 takes the reader through a historical journey towards intelligent ERP systems In addition reference processes and a  
 reference architecture for ERP systems are proposed which build the foundation for the suggested subsequent solution  
 concept including a method for operationalizing intelligence for ERP business processes Subsequently in the second part  
 detailed concepts of embedding artificial intelligence into ERP software are proposed In this context the suggested solution  
 architecture is depicted and specific topics are resolved like data integration model validation explainability data protection  
 and privacy model degradation and performance In the last part an implementation framework is suggested which enables  
 the previously introduced concepts and harmonizes the development and operations of artificial intelligent ERP applications  
 This part concludes with case studies considering artificial intelligence scenarios of SAP S 4HANA in the areas of logistics  
 finance and sales which apply the defined solution approach and shows its real world feasibility This book is written for
