Video gaming has long been understood as a masculinised social space and while increasing numbers of girls and women now engage in the pastime boys and men remain the predominant social actors. Furthermore the gaming community has been widely identified as a prime case study in broader concerns around toxic masculinity and gendered online harassment. However there is also underexamined evidence of a growing movement in the community coming forward to voice its collective opposition. Utilising an innovative combination of computational and qualitative methods the research undertaken here exposes this fuller picture revealing significant contestation and a spectrum of attitudes that mark out this popular gaming community as a battleground for gender in equality. Students and scholars across a range of disciplines including gender studies media studies cultural studies sociology games studies and computer sciences will find this book of interest.
