eating Ruth Reichl author of Save Me the Plums Investigative journalist Barry Estabrook was often on the receiving end of his doctor's scowl. Realizing he had two options take more medication or lose weight Estabrook chose the latter but was paralyzed by the options. Which diet would keep the weight off? What program could he maintain over time? What diet works best or even at all? Over the course of three years Estabrook tried the regimens behind the most popular diets of the past forty years from paleo keto gluten free and veganism to the Master Cleanse Whole30 Atkins Weight Watchers examining the people's claims and science behind the fads all while recording his mental and physical experience of following each one. Along the way he discovered that all the branded programs are derived from just three diets. There are effective scientifically valid takeaways to be cherry picked and the rest is just marketing. Perhaps most alarming Estabrook uncovered how short term weight loss can do long term health damage that may go undetected for years. Estabrook contextualizes his reporting with an analysis of our culture's bizarre dieting history dating back to the late 1800s to create a thorough and thoroughly entertaining look at what specific diets do to our bodies why some are more effective than others and why our relationship with food is so fraught. Estabrook's account is a relatable pragmatic look into the ways we try to improve our health through dieting revealing the answer may be to just eat.
