*The Russian Intelligentsia* Christopher Read, 2024-02-22 The Russian Intelligentsia is the first single volume history of a small but tremendously influential group of Russian intellectuals who achieved world renown in a variety of spheres. While previous accounts have addressed the history of individuals within this collective, Christopher Read offers the first explanation of the intelligentsia as a group. Read traces the vast debates that broke out between and within a multitude of intellectual factions and contextualizes the ideas of the group within the framework of cultural, social, political and economic development from the late 18th century to the present day. This comprehensive yet accessible account demonstrates how the Russian intelligentsia morphed from one incarnation to the next and effectively situates this change and continuity within a pan-European context. It considers the role of the intelligentsia throughout its origins, its transformation during the Russian Revolution and since the collapse of communism, and highlights the beliefs of key figures such as Fyodor Dostoyevsky, Ivan Pavlov, Vladimir Lenin, Leon Trotsky and Mikhail Gorbachev. In doing so, Read provides an essential guide to a fascinating aspect of Russia's social and cultural history.

*A Resurgent East Asia* Andrew D. Mason, Sudhir Shetty, 2018-01-04 East Asia has been a paragon of global development success. The dramatic transformation of the region over the past half century, with a succession of countries having progressed from low income to middle income and even to high income status, has been built on what has come to be known as the East Asian development model. A combination of policies that fostered outward-oriented, labor intensive growth while strengthening basic human capital and providing sound economic governance, has been instrumental in moving hundreds of millions of people out of poverty and into economic security. Yet East Asia's economic resurgence remains incomplete. More than 90 percent of its people now live in 10 middle income countries, many of which can realistically aspire to high income status in the next generation or two. But these countries are still much less affluent and productive than their high income counterparts. Even as the region's middle income countries attempt to move up to high income status, they confront a rapidly changing global and regional economic environment. Slowing growth in global trade and shifts in its patterns, rapid technological change and evolving country circumstances, all present challenges to sustaining productivity growth, fostering inclusion and enhancing state effectiveness. *A Resurgent East Asia: Navigating a Changing World* is about how policy makers across developing East Asia will need to adapt their development model to effectively address these challenges in the coming decade and sustain the region's remarkable development performance. The world is changing. How do East Asia's developing economies navigate this change? This is a commendable book on this topic, a must read for policy makers, academia and students who are interested in East Asia. Chatib Basri, Former Minister of Finance, Government of Indonesia. *A Resurgent East Asia* is a vital publication for the most successful region as it looks to the future and the expectations of its citizens. This study helps to identify the new areas of risk and to suggest ways to ameliorate them. In so doing, it is an invaluable resource for governments. Based on first rate analysis, it is a must read for policy makers.
