Cli-Fi and Class Debra J. Rosenthal, Jason de Lara, Molesky, 2023-10-09. Since its emergence in the late twentieth century, climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed, with its insistent focus on redressing social disparities, cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies, literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological, addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy, and Octavia Butler to the film Black Panther and the Broadway musical Hadestown, this collection unpacks the complex ways economic exploitation impacts planetary well-being and the ways climatic change shapes those inequities in turn.

Our Shared Storm Andrew Dana Hudson, 2022-04-05. Through speculative fiction, five interlocking novelettes explore the possible realities of our climate future. What is the future of our climate? Given that our summers now regularly feature Arctic heat waves and wildfire blood skies, polar vortex winters that reach all the way down to Texas, and 100 year storms that hit every few months, it may seem that catastrophe is a done deal. As grim as things are, however, we still have options. Combining fiction and nonfiction and employing speculative tools for scholarly purposes, Our Shared Storm explores not just one potential climate future but five possible outcomes dependent upon our actions today. Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson, Our Shared Storm features five overlapping fictions to employ a futurist technique called scenarios thinking. Rather than try to predict how history will unfold, picking one out of many unpredictable and contingent branching paths, it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways (SSPs). The setting is the year 2054 during the Conference of the Parties global climate negotiations, a.k.a. The COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic, and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road, or abandoned altogether. From harrowing to hopeful, these stories highlight the choices we must make to stabilize the planet. Our Shared Storm is an experiment in deploying practice-based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.

Fire and Snow Marc DiPaolo,2018-08-01 A broad examination of climate fantasy and science fiction from The Lord of the Rings and the Narnia series to The Handmaid's Tale and Game of Thrones Fellow Inklings J R R Tolkien and C S Lewis may have belonged to different branches of Christianity but they both made use of a faith based environmentalist ethic to counter the mid twentieth century's triple threats of fascism utilitarianism and industrial capitalism In Fire and Snow Marc DiPaolo explores how the apocalyptic fantasy tropes and Christian environmental ethics of the Middle earth and Narnia sagas have been adapted by a variety of recent writers and filmmakers of climate fiction a growing literary and cinematic genre that grapples with the real world concerns of climate change endless wars and fascism as well as the role religion plays in easing or escalating these apocalyptic level crises Among the many other well known climate fiction narratives examined in these pages are Game of Thrones The Hunger Games The Handmaid's Tale Mad Max and Doctor Who Although the authors of these works stake out ideological territory that differs from Tolkien's and Lewis's DiPaolo argues that they nevertheless mirror their predecessors ecological concerns The Christians Jews atheists and agnostics who penned these works agree that we all need to put aside our cultural differences and transcend our personal socioeconomic circumstances to work together to save the environment Taken together these works of climate fiction model various ways in which a deep ecological solidarity might be achieved across a broad ideological and cultural spectrum This book is remarkably diverse in its literary cinematic journalistic and graphics media sources and the writing is equally authoritative in all these domains DiPaolo's prose moves deftly from a work of fiction to its film avatar to the political and societal realities they address and back again into other cultural manifestations and then into and out of the deep theory of climate fiction literary scholarship ecofeminism religious tradition and authorial biographies It contributes considerably to all of these fields and is indispensable for climate and environmental literature classes It's also a must have for general readers of the genre Jonathan Evans coauthor of Ents Elves and Eriador The Environmental Vision of J R R Tolkien I like it No I love it This book is both broad and deep and yet it remains both very readable and constantly interesting It's the sort of book that can only be written by someone who is a good reader of both books and culture As I was reading it I thought this is like being at a party and

meeting someone brilliant and fun and finding that I'm enjoying that person's company so much that I don't notice the time flying by. It's not often that a scholarly book does that to me.
