Classical Loop In Loop Chains:

Classical Loop-in-Loop Chains J.R. Smith, 2013-04-18 This is not only a book of instruction in chainmaking but it is also a work celebrating man's continuous creativity over thousands of years. At times something that man creates has far reaching effects; an example that quickly comes to mind is the wheel which has enabled many developments from pottery to computers. At this point it is important to note that these same wheels could not have been made without metal tools. From early Neolithic times on gold was a favorite choice in the making of jewelry. During the Neolithic period these shining stones, probably alluvial, were prized. Actually gold was cold worked as if it were a stone. There is a surviving example of cold worked gold from Catalhuyuk, present day Turkey, estimated to have been made in 6500 B.C. There were only four metals on the earth's surface that were found in sufficient quantity to be used: gold, copper, silver, and meteoric iron. An understanding of the malleability of gold and of the annealing effect of fire changed jewelry making; new forms were found. Gold was no longer a piece of stone but a material that could be flattened and made very thin. Sheet and foil are the oldest forms of worked gold. The smith's tools were stone, wood, and horn.

Early Makuria Research Project. El-Zuma Cemetery (3-vol. set) Mahmoud El-Tayeb, Ewa Czyżewska-Zalewska, Urszula Iwaszczuk, Jolanta Juchniewicz, Zofia Kowarska, Iwona Kozieradzka-Ogunmakin, Szymon Lenarczyk, Robert Mahler, Ewa Skowrońska-Zych, Aneta Cedro, 2021-05-03. The three volume publication of the results of archaeological excavations at the UNESCO heritage site of El Zuma in Sudan investigated by PCMA University of Warsaw and the National Corporation for Antiquities and Museums in Khartoum presents an Early Makurian elite tumuli cemetery from the 5th-6th centuries AD. This period in ancient Nubian history preceding the rise of the Christian kingdoms has long been understudied. Informed analyses by an array of specialists on the team cover the archaeological and bioarchaeological evidence from the tombs. Volume 1 as well as the abundant ceramics. Volume 2 and small finds especially jewellery, weaponry and personal accessories. Volume 3. The outcome is a people oriented view of an elite community in ancient Nubia at the dawn of a new age in its history.

Ancient Mesopotamian Materials and Industries Peter Roger Stuart Moorey, 1999. This is the first systematic attempt to survey in detail the archaeological evidence for the crafts and craftsmanship of the Sumerians, Babylonians, and Assyrians in ancient Mesopotamia covering the period ca. 8000-300 B.C.E. As creators of some of the earliest farming and urban communities known to us, these people were among the first pioneers of many crafts and skills that remain fundamental to modern ways of life. Many of the raw materials for crafts had to be imported from outside the river valley of the Tigris and Euphrates, providing an unusually sensitive indicator of the commercial and cultural contacts of Mesopotamia. In this book Dr Moorey reviews briefly the textual evidence and then goes

on to examine in detail the material evidence for a wide range of crafts using stones both common and ornamental animal products from hippopotamus ivory to ostrich egg shells ceramics glazed materials and glass metals and building materials With a comprehensive bibliography this will be a key work of reference for archaeologists and those interested in the early history of crafts and technology as well as for specialist historians of the ancient Near East Mastering Robot dynamics
