M. J. Vroom, 1992 Outdoor Space does offer a unique survey of typically Dutch landscape architecture. Some forty highly qualified projects have been selected. These do not only concern traditional object related design like gardens and parks but also design for the larger rural and urban areas closely interrelating the parts of the outdoor space. The individual project descriptions are preceded by an extensive explanation about the notion of landscape architecture and the working procedure of the landscape architect. Outdoor Space can be regarded as an important documentation of the trends and developments in the field of Dutch landscape architecture and it presents a clear picture of the achievements of contemporary landscape architects.
