

Chem 11, Spring 2012 Practice Test 2

1) In ionic compounds, _____ lose their valence electrons to form positively charged _____.

- (A) metals, atoms
- (B) nonmetals, cations
- (C) metals, polyatomic ions
- (D) nonmetals, anions
- (E) metals, cations

2) An anion always _____.

- (A) has a positive charge.
- (B) contains a group of two or more atoms with a positive charge.
- (C) contains a metal and a nonmetal.
- (D) forms covalent bonds.
- (E) has a negative charge.

3) What is the ionic charge of an ion with 18 protons and 15 electrons?

- (A) 3+
- (B) 2+
- (C) 3-
- (D) 2-
- (E) 3-

4) The correct formula for a compound formed from the elements Al and O is _____.

- (A) AlO
- (B) Al_2O_1
- (C) Al_2O_3
- (D) AlO_2
- (E) Al_2O_5

5) A(n) _____ is the smallest neutral unit of two or more atoms held together by a covalent bond.

- (A) ionic compound
- (B) nucleus
- (C) molecule
- (D) formula
- (E) unit

Chem 11 Spring 2012 Practice Test

Aubrey Milunsky,Jeff M. Milunsky

Chem 11 Spring 2012 Practice Test:

Teach Students How to Learn Saundra Yancy McGuire, 2023-07-03 Co published with NISOD Miriam a freshman Calculus student at Louisiana State University made 37.5% on her first exam but 83% and 93% on the next two. Matt a first year General Chemistry student at the University of Utah scored 65% and 55% on his first two exams and 95% on his third. These are representative of thousands of students who decisively improved their grades by acting on the advice described in this book. What is preventing your students from performing according to expectations? Saundra McGuire offers a simple but profound answer. If you teach students how to learn and give them simple straightforward strategies to use, they can significantly increase their learning and performance. For over a decade Saundra McGuire has been acclaimed for her presentations and workshops on metacognition and student learning because the tools and strategies she shares have enabled faculty to facilitate dramatic improvements in student learning and success. This book encapsulates the model and ideas she has developed in the past fifteen years ideas that are being adopted by an increasing number of faculty with considerable effect. The methods she proposes do not require restructuring courses or an inordinate amount of time to teach. They can often be accomplished in a single session transforming students from memorizers and regurgitators to students who begin to think critically and take responsibility for their own learning. Saundra McGuire takes the reader sequentially through the ideas and strategies that students need to understand and implement. First she demonstrates how introducing students to metacognition and Bloom's Taxonomy reveals to them the importance of understanding how they learn and provides the lens through which they can view learning activities and measure their intellectual growth. Next she presents a specific study system that can quickly empower students to maximize their learning. Then she addresses the importance of dealing with emotion, attitudes, and motivation by suggesting ways to change students' mindsets about ability and by providing a range of strategies to boost motivation and learning. Finally she offers guidance to faculty on partnering with campus learning centers. She pays particular attention to academically unprepared students noting that the strategies she offers for this particular population are equally beneficial for all students. While stressing that there are many ways to teach effectively and that readers can be flexible in picking and choosing among the strategies she presents, Saundra McGuire offers the reader a step by step process for delivering the key messages of the book to students in as little as 50 minutes. Free online supplements provide three slide sets and a sample video lecture. This book is written primarily for faculty but will be equally useful for TAs, tutors, and learning center professionals. For readers with no background in education or cognitive psychology, the book avoids jargon and esoteric theory.

Affective Dimensions in Chemistry Education Murat Kahveci, Mary Kay Orgill, 2015-01-08. This is a unique resource for those wishing to address the affective domain as they research and solve problems in chemistry education. Contributions by world leading experts cover both fundamental considerations and practical case studies. This work fills a gap in the literature of chemistry education which so far has focused mainly on the cognitive

domain The affective domain refers to feelings based constructs such as attitudes values beliefs opinions emotions interests motivation and a degree of acceptance or rejection It can affect students interest in science topics and their motivation to persevere in learning science concepts

Maternal-Fetal and Neonatal Endocrinology Christopher S. Kovacs,Cheri L.

Deal,2019-10-12 Maternal Fetal and Neonatal Endocrinology Physiology Pathophysiology and Clinical Management systematically examines the normal and abnormal endocrinology of the pregnant and lactating female and of the fetus and neonate This reference volume expands coverage of specific disorders and diseases beyond the current endocrinology content on the market which in most cases has a paragraph or no mention at all about pregnancy or aspects of fetal neonatal development Formalized source of maternal fetal endocrine physiology and pathophysiology Key reference for fellows and residents for rarer endocrine pathologies Integrated presentation of new molecular and genetic causes of endocrine disorders Bridges the experience knowledge gap of endocrinopathies rarely encountered in pregnancy

Chemistry and Industry ,2012 *100 questions and answers for job interview Offshore Drilling Platforms* PETROGAV INTERNATIONAL,

This book offers you a brief but very involved look into the operations in the drilling of an oil gas wells that will help you to be prepared for job interview at oil gas companies From start to finish you ll see a general prognosis of the drilling process If you are new to the oil gas industry you ll enjoy having a leg up with the knowledge of these processes If you are a seasoned oil gas person you ll enjoy reading what you may or may not know in these pages This course provides a non technical overview of the phases operations and terminology used on offshore drilling platforms It is intended also for non drilling personnel who work in the offshore drilling exploration and production industry This includes marine and logistics personnel accounting administrative and support staff environmental professionals etc No prior experience or knowledge of drilling operations is required This course will provide participants a better understanding of the issues faced in all aspects of drilling operations with a particular focus on the unique aspects of offshore operations
