Redesigning Healthcare Work Craig E. Kuziemy, Zoie Shui-Yee Wong, 2017-08-15 Health informatics applications will be a cornerstone of the next generation healthcare delivery system These applications will support the delivery of safe patient centered care and collaborative care delivery The complexity of modern healthcare is delivered by many different specialties to many different patients with complex diseases and comorbidity A one size fits all approach is not adequate to reach the triple aim of improving the patient experience of care improving the health of populations and reducing the per capita cost of healthcare Health informatics applications must rather be built to be adaptable and sensitive to the complex contexts where they will be used The health informatics community has long been interested in the role that context plays in the design implementation and evaluation of Health IT We have come to realize that context is not just a passive characteristic that impacts Health IT usage but rather is embedded in the core of the users processes and outcomes that Health IT interacts with Therefore we need better approaches to study and understand its impact on Health IT usage in different healthcare

settings This book contains the conference papers from CSHI 2017 Delivering 21st Century Healthcare Building a Quality and Efficiency Driven System It contains papers on a variety of topics that are divided into four sections Theoretical approaches to investigate context sensitive health informatics to generate robust evidence Redesigning healthcare work practices Patient participation in healthcare design and redesign and Human factors and usability The 2017 CSHI conference continues our efforts to develop robust scientific evidence on context and Health IT , Information Technology in Health Care 2007 Johanna Westbrook, Johanna I. Westbrook, 2007 This volume presents the papers from the 3rd International Conference on Technology in Health Care Socio technical Approaches held in Sydney Australia in 2007 Health Informatics Sue Whetton, 2005 Health informatics is a multi disciplinary multi dimensional field which seeks to facilitate the effective collection management and use of information in the health care environment Taking a socio technical perspective Health Informatics focuses on the interplay between the health care environment and the systems used to manage that environment Highly practical in orientation the book uses many and various examples of the different issues priorities and approaches to using health information technology to assist students to identify and critique these differing perspectives
