Reminiscences of a Statistician Erich L. Lehmann, 2007-12-26 This relatively nontechnical book is the first account of the history of statistics

from the Fisher revolution to the computer revolution It sketches the careers and highlights some of the work of 65 people most of them statisticians What gives the book its special character is its emphasis on the author s interaction with these people and the inclusion of many personal anecdotes Combined these portraits provide an amazing fly on the wall view of statistics during the period in question The stress is on ideas and technical material is held to a minimum Thus the book is accessible to anyone with at least an elementary background in statistics

Guide to Information Sources in Mathematics and Statistics Martha A. Tucker, Nancy D. Anderson, 2004-09-30 This book is a reference for librarians mathematicians and statisticians involved in college and research level mathematics and statistics in the 21st century We are in a time of transition in scholarly communications in mathematics practices which have changed little for a hundred years are giving way to new modes of accessing information Where journals books indexes and catalogs were once the physical representation of a good mathematics library shelves have given way to computers and users are often accessing information from remote places Part I is a historical survey of the past 15 years tracking this huge transition in scholarly communications in mathematics Part II of the book is the bibliography of resources recommended to support the disciplines of mathematics and statistics These are grouped by type of material Publication dates range from the 1800 s onwards Hundreds of electronic resources some online both dynamic and static some in fixed media are listed among the paper resources Amazingly a majority of listed electronic resources are free
