**Compose Yourself!** David Alzofon, 2011-01-06 Improvising a melody crafting a catchy tune doesn't take a ton of talent. Talent helps but anyone can learn to speak the language of music. That's the message of **Compose Yourself** a radically new course in musical creativity inspired by the author's lessons with Jef Raskin the UC San Diego music professor and Silicon Valley guru who created the Macintosh computer and renowned jazz guitarist educator Howard Roberts founder of Musicians Institute Los Angeles. tertiary songwriting lectures I deliver I began writing a weekly blog for my students about my 40 year career as a songwriter musician Student response was unexpected immediate and overwhelming it was clear that the blogs addressed a type of learning and information not covered in the lectures and other music study undertaken at the college and the students clamoured for more of this informal anecdotal context Looking back on a life as a songwriter one makes a myriad of choices and decisions during the act of creating songs My life and career in music is peppered liberally with wonderful informative experiences and as a result of past failures victories fortune and misfortune I have compiled the cultural capital or habitus necessary to succeed This book is not a quest for the formula for writing a hit song for that would be nonsensical It is an endeavour to observe and codify patterns of professional practice that have been recognised as successful by audiences and

experts in the field and to organise those observations into generalizable theories that may be applied so as to create more successful song outcomes Once identified such theories need to be explained in a manner clear enough for a reliable transfer of knowledge to occur so that the individual songwriter has all the necessary tools to create their own idiosyncratic expressions in song not to pretend that some contrived notion of a perfect repeatable song method exists In order to answer the question How do creative songwriters do what they do when they do it I have attempted to Simplify Cite reference and cherry pick what s important for knowledge transferSynthesise ideas approaches perspectives and teaching approachesHypothesise my own contributions comments evaluations and preferencesIntegrate the theory of Multiple Intelligences described by Gardner implying multiple ways to learnProvide notated music examples as references of our inadequate Western musical symbol system as well as tables diagrams and visual images whenever possible Clarify highlight and explain concisely translate concepts into plain English Contextualise include one or more blog anecdote or both in each small section
