## **Computer Aided Production Engineering Cape 2003:**

*Fifth National Conference on Rapid Design, Prototyping and Manufacture* David M. Jacobson, Allan Rennie, Chris Bocking, 2004-09-24 Rapid Prototyping and allied fields are still relatively young technologies and as such their scope and range are expanding at a dramatic rate. New and improved techniques and applications are developing and this is reflected in the varied topics covered in Rapid Design Prototyping and Manufacture. Efforts to extend the scope of application of three dimensional printing processes is an important milestone in rapid manufacture. This is being vigorously addressed and is well represented in this volume. It now seems to be only a matter of time before three dimensional printing units will join other peripherals in office and domestic computer systems to produce toys, small domestic and office items on demand.

**CONTENTS**  
**INCLUDE** Analysis of the application of the Z corps three dimensional printing system for rapid tooling for plastic injection moulded components A novel method for rapid prototyping tooling manufacture Shell Assisted Layer Manufacture SALM Accuracy of a novel fused deposition modelling technology New software tools for reverse engineering parts based on three dimensional volumetric scans A structured approach to the simplification of optimization problems in the virtual prototyping environment The appropriate application of computer aided design and manufacture techniques in silicone facial prosthetics Application of the Z Corps three dimensional printing processes using novel material to manufacture bio scaffold for bone replacement Rapid prototyping manufacture of complex three dimensional microscaffolds used in regenerative medicine

**Sci-tech News**, 2003 *Computer Aided Production Engineering* J. A. McGeough, 2003-05-07 Computer aided Production Engineering contains valuable information from both industry and academia to discuss progress in research and development in this major branch of engineering that affects all industrialized countries. Manufacturing globally has witnessed major transitions the rapid advancement in electronics and communication technologies enables design and manufacture to proceed on an international dimension that until now could not be anticipated. The advent of these technologies has affected large medium and small sized enterprises throughout the world. Emphasis is moving towards procedures that employ innovative and new uses of computer aided production engineering techniques as an aid to the manufacture of prostheses by well known methods of computer aided design and manufacture and the use of agile manufacture and robotics. Computer aided Production Engineering will be of great interest for all those involved in product design manufacturing processes automated machinery and the most up to date advances in this far reaching area of engineering. Topics covered include Computer aided Design and Manufacture Computer aided Process Planning Quality in Manufacturing and Design Concurrent Engineering and Design for Manufacture Production and Control AI Applications in Manufacturing Manufacturing and Supply Chain Management Manufacturing Processes Rapid Prototyping Robotics in Medicine Computer aided Orthopaedic Surgery **Index of Conference Proceedings** British Library, Document Supply Centre, 2003 **Methods and Tools for Effective Knowledge Life-Cycle-Management** Alain Bernard, Serge

Tichkiewitch,2008-04-01 Knowledge Management is a wide critical and strategic issue for all the companies from the SMEs to the most complex organizations The key of competitiveness is knowledge because of the necessity of reactivity flexibility agility and innovation capacities Knowledge is difficult to measure itself but what is visible this is the way of improving products technologies and enterprise organizations During the last four years based on the experience of most of the best experts around the World CIRP The International Academy for Production Engineering has decided to prepare and structure a Network of Excellence NoE proposal The European Community accepted to found the VRL KCIP Virtual Research Laboratory Knowledge Community in Production As its name indicates it the aim of this NoE was really to build a Knowledge Community in Production This was possible and realistic because the partners were representative of the most important universities in Europe and also because of strong partnerships with laboratories far from Europe Japan Australia South Africa USA etc Based on such powerful partnership the main issue was to help European manufacturing industry to define and structure the strategic knowledge in order to face the strategic worldwide challenges Manufacturing in Europe currently has two essential aspects 1 It has to be knowledge intensive given the European demands for high tech products and services e g electronics medicines
