## **Creating Public Value Creating Public Value:**

Creating Public Value Mark Harrison Moore, Mark H. Moore, 1995 A summation of 15 years of research on what public sector executives should do to improve the performance of public enterprises Cases are used to illuminate their broader lessons for government managers

**Public Value** John Benington, Mark Moore, 2010-11-30 This text provides a concise and internationalized restatement of the public value approach an assessment of its impact to date in theory and practice and of its particular relevance to the challenges of public management in a time of crisis and austerity

Recognizing Public Value Mark H. Moore, 2013-02-15 Moore's classic *Creating Public Value* offered advice to managers about how to create public value but left unresolved the question how one could recognize when public value had been created Here he closes the gap by helping public managers name observe and count the value they produce and sustain or increase public value into the future

Creating Public Value in Practice John M. Bryson, Barbara C. Crosby, Laura Bloomberg, 2015-02-13 *Creating Public Value in Practice* Advancing the Common Good in a Multi Sector Shared Power No One Wholly in Charge World brings together a stellar cast of thinkers to explore issues of public and cross sector decision making within a framework of democratic civic engagement It offers an integrative approach to understanding and applying the concept of *Public Value and Public Administration* John M. Bryson, Barbara C. Crosby, Laura Bloomberg, 2015-08-18 Governments and nonprofits exist to create public value Yet what does that mean in theory and practice This new volume brings together key experts in the field to offer unique wide ranging answers From the United States Europe and Australia the contributors focus on the creation meaning measurement and assessment of public value in a world where government nonprofit organizations business and citizens all have roles in the public sphere In so doing they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them They also add to ongoing debates over what public value might mean the nature of the most important public values and how we can practically apply these values The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas Aimed at scholars students and stakeholders ranging from business and government to nonprofits and activist groups *Public Value and Public Administration* is an essential blueprint for those interested in creating public value to advance the common good

**Public Value and Public Administration** John M. Bryson, Barbara C. Crosby, Laura Bloomberg, 2015-08-28 Governments and nonprofits exist to create public value Yet what does that mean in theory and practice This new volume brings together key experts in the field to offer unique wide ranging answers From the United States Europe and Australia the contributors focus on the creation meaning measurement and assessment of public value in a world where government nonprofit organizations business and citizens all have roles in the public sphere In so doing they demonstrate the intimate link between ideas of public value and public values and the ways scholars theorize and measure them They also add to ongoing debates over what public value might mean the nature of the most important public values and how we can

practically apply these values The collection concludes with an extensive research and practice agenda conceived to further the field and mainstream its ideas Aimed at scholars students and stakeholders ranging from business and government to nonprofits and activist groups Public Value and Public Administration is an essential blueprint for those interested in creating public value to advance the common good *Reimagining Public Managers* Usman W. Chohan,2020-09-03 Public value theory speaks to the co creation of value between politicians citizens and public managers with a focus on the public manager in terms of her contributions initiatives and limitations in value creation But just who are public managers Public value regularly treats the public manager as synonymous with bureaucrat government official civil servant or public administrator However the categories of public managers represent a more versatile and expansive set of agents in society than they are given credit for and the discourse of public value has typically not delved sufficiently into the variety of possible cadres that might comprise the public manager This book seeks to go beyond the assumed understandings of who the public manager is and what she does It does so by examining the processes of value creation that are driven by non traditional sets of public managers which include the judiciary the armed forces multilateral institutions and central banks It applies public value tools to understand their value creation and uses their unique attributes to inform our understanding of public value theory Tailored to an audience comprising public administration scholars students of government public officials practitioners and social scientists interested in contemporary problems of values in society this book helps to advance public administration thought by re examining the theory s ultimate protagonist the public manager It therefore constitutes an important effort to take public value theory forward by going beyond conceptions of the public manager as she has thus far been understood **Unlocking Public Value** Martin Cole,Greg Parston,2006-09-11 A new approach to understanding and improving performance and public value This book presents the Public Service Value Model an innovative rigorous approach to defining public outcomes and quantifying results to help readers understand and improve public service delivery Filled with in depth insight and expert advice this guide will arm public service managers whether in government nonprofit or even for profit organizations with a practical framework that can be used to define outcomes and manage trade offs in public service delivery Martin Cole Hartford CT is Group Chief Executive of Accenture s Government Operating Group Greg Parston London UK is Executive Director of the Accenture Institute for Public Service Value *Creating Public Value* Bernadette Conraths,1997 *Public Value Management, Governance and Reform in Britain* John Connolly,Arno van der Zwet,2020-11-23 This book examines developments in governance reform in Britain with a particular focus on the period since 2010 We argue that the experiences of the past decade mean that public value based ideas are required to inform governance reform for the coming years This needs to be prioritised due to the twin challenges of managing the aftermath of Brexit and navigating through the recovery phase of the COVID 19 pandemic The volume outlines key themes issues and debates relevant to contemporary public sector reform including modes of state governance evidence based policy making

debates the challenges and possibilities of public sector innovation accountability issues and the implications of Brexit The overall conclusion of the book is that the coming decade presents an opportunity for more paradigmatic changes to UK governance but for this to happen political leaders need to prioritise a reinventing government agenda underpinned by public value based thinking and approaches This book will be of particular interest to students of politics and public administration and relevant for those with general research interests in British governance and public policy

**Governance Models for Creating Public Value in Open Data Initiatives** Manuel Pedro Rodríguez Bolívar, Kelvin Joseph Bwalya, Christopher G. Reddick, 2019-05-07

This book relies on the conceptual model of Open Government OG focusing on transparency and concretely in open data initiatives at the local government context with the aim of improving participation and collaboration Most Open Government models are centered on three pillars transparency participation and collaboration Transparency is a crucial ingredient of OG and applied to data openness means to ensure that the data are well known comprehensible easily accessible and open to all new governance models based on different open data models have not been proposed up to now The chapter authors seek to contribute recent research to the discussion on governance models of open data initiatives to support Open Governments with the aim of creating public value It includes both theoretical and empirical studies on governments models in open data initiatives

Understanding and Creating Public Value Fred Thompson, Polly S. Rizova, 2014 In this essay we define the meaning and content of public value show how government and business create public value and briefly explain why their governance arrangements work the way they do We deal first with business and then government We conclude that government manages risks and that governmental value creation is distinctively concerned with stability Hence to make government work better risk management ought to be central to the practice of public finance public policy and public administration Understanding the importance of stability is potentially of even greater importance to those who research and teach public policy and administration Indeed we propose that the elaboration of a general risk assessment model explaining among other things government s systemic inclination to stability would take our field a long towards integration with mainstream positive social science and therefore holds out the prospect of considerable interdisciplinary consilience although at this time we can do no more than suggest the contours of such a model

**Capitalising on Culture, Competing on Difference** Finbarr Bradley, James J. Kennelly, 2009-02-23 After two decades of exceptional economic growth and cultural change Ireland faces the greatest challenge yet creating a sustainable competitive advantage to guarantee its success in the future Finbarr Bradley and James Kennelly recommend a renewed sense of national identity as social and cultural capital to maintain and enhance Ireland s economic development

*Challenges to Public Value Creation* Brian J. Cook, 2024-03-27 This powerful collection shows that public value has come of age Its reach has extended far beyond the Anglosphere from which it has emerged And it provides a prism for strategic thinking about how governments are to deal with the grittiness of the contexts and challenge they currently face This must

read volume sits at the cutting edge of these important developments Paul t Hart Professor of Public Administration Utrecht University The Netherlands Challenges to Public Value Creation is a wonderful addition to the growing literature on public value creation John M Bryson McKnight Presidential Professor Emeritus University of Minnesota USA The purpose of government is to create public value While this has become an increasingly accepted refrain in public policy administration and management numerous questions remain about where when why how and by whom public value is created With everything from philosophical and conceptual arguments to empirical analyses and cases the contributors to this noteworthy volume offer new ideas reveal important insights suggest exciting directions for research and practice and ultimately give more substance and shape to the idea of public value creation Tina Nabatchi Director Program for the Advancement of Research on Conflict Collaboration Syracuse University USA This volume examines fundamental questions about the public value of public decisions More specifically it seeks to assess whether all public decisions create public value if it is possible to know what value for the public as a whole a government decision will create and how government officials can justify their decisions in terms of public value Leading experts bring a diverse array of perspectives on the normative epistemological and processual challenges to identifying describing measuring and evaluating the public value claims that public officials often articulate in defending their decisions and the results that citizens often seek The book will appeal to scholars and students of public policy and public administration Brian J Cook is Emeritus Professor of Public Administration and Policy at Virginia Tech USA *Museums and Public Value* Carol A. Scott, 2016-04-22 Public Value speaks to our time to the role that museums can play in creating civil societies to the challenges involved in using limited assets strategically to the demand for results that make a difference and to the imperative that we build the kind of engagement that sustains our futures This book assists museum leaders to implement a Public Value approach in their management planning programming and relationship building The benefits are long term public engagement and support which can be used to demonstrate that valuable returns result from public investment in museums A range of authors from around the world unpack the concept of Public Value and examine its implications for museums They situate Public Value within current management theory and practice offer tools for implementation highlight examples of successful practice and examine the evidence of Public Value that governments seek to inform policy and funding decisions The book will be required reading for senior professionals in museums as well as museum and heritage studies students *Creating Public Value Through Open Government*, 2015

Public Values and Public Interest Barry Bozeman, 2007-10-24 Economic individualism and market based values dominate today's policymaking and public management circles often at the expense of the common good In his new book Barry Bozeman demonstrates the continuing need for public interest theory in government Public Values and Public Interest offers a direct theoretical challenge to the utility of economic individualism the prevailing political theory in the western world The book's arguments are steeped in a practical and practicable theory that advances public interest as a viable and important

measure in any analysis of policy or public administration According to Bozeman public interest theory offers a dynamic and flexible approach that easily adapts to changing situations and balances today s market driven attitudes with the concepts of common good advocated by Aristotle Saint Thomas Aquinas John Locke and John Dewey In constructing the case for adopting a new governmental paradigm based on what he terms managing publicness Bozeman demonstrates why economic indices alone fail to adequately value social choice in many cases He explores the implications of privatization of a wide array of governmental services among them Social Security defense prisons and water supplies Bozeman constructs analyses from both perspectives in an extended study of genetically modified crops to compare the policy outcomes using different core values and questions the public value of engaging in the practice solely for the sake of cheaper food Thoughtful challenging and timely Public Values and Public Interest shows how the quest for fairness can once again play a full part in public policy debates and public administration

**Public Value** Adam Lindgreen,Nicole Koenig-Lewis,Martin Kitchener,John Brewer,Mark Moore,Timo Meynhardt,2019-05-08 Over the last 10 years the concept of value has emerged in both business and public life as part of an important process of measuring benchmarking and assuring the resources we invest and the outcomes we generate from our activities In the context of public life value is an important measure on the contribution to business and social good of activities for which strict financial measures are either inappropriate or fundamentally unsound A systematic interdisciplinary examination of public value is necessary to establish an essential definition and up to date picture of the field In reflecting on the public value project this book points to how the field has broadened well beyond its original focus on public sector management has deepened in terms of the development of the analytical concepts and frameworks that linked the concepts together and has been applied increasingly in concrete circumstances by academics consultants and practitioners This book covers three main topics deepening and enriching the theory of creating public value broadening the theory and practice of creating public value to voluntary and commercial organisations and collaborative networks and the challenge and opportunity that the concept of public value poses to social science and universities Collectively it offers new ways of looking at public and social assets against a backdrop of increasing financial pressure new insights into changing social attitudes and perceptions of value and new models for increasingly complicated collaborative forms of service delivery involving public private and not for profit players American Architect and Building News ,1876

**Public Value Co-Creation** Alessandro Sancino,2022-08-08 Public Value Co Creation A Multi Actor Multi Sector Perspective addresses a fundamental gap in the scholarly field of Public Management relating to the advice and resources available on what public managers can and or should do to co create public value
