Studies in Intelligence, 2012 New Tools for Collaboration Gregory F. Treverton, 2016-01-26 The Intelligence Community does not lag far behind the private sector in using collaborative tools indeed it has developed an impressive array However the most used tools like instant messaging IM are employed primarily within agencies for peer to peer communication and hence are neither widely collaborative nor especially novel they are different ways of accomplishing familiar functions The array of collaborative tools across agencies ranging from IM to blogs to a wiki called Intellipedia is impressive but used mostly by enthusiasts This report identifies lessons learned from looking at the use of internal collaborative tools across the Intelligence Community especially across the four biggest agencies Central Intelligence Agency Defense Intelligence Agency National Security Agency and National Geospatial Intelligence Agency *Research in Organizational Change and Development* William A. Pasmore, Richard W. Woodman, Abraham B. (Rami) Shani, 2011-07-07 In this diverse volume new methodologies are introduced such as the strategic fitness process for engaging leaders in better understanding the reactions of employees to strategic change efforts Beer Jazz as a metaphor for organizational improvisation Bernstein and new theories for understanding change processes Gomez Ballard *Collaborative Intelligence* Dawna Markova, Angie McArthur, 2015-08-11 A breakthrough book on the transformative power of collaborative thinking Collaborative intelligence or CQ is a measure of our ability to think with others on behalf of what matters to us all It is emerging as a new professional currency at a time when the way we think interact and innovate is shifting In the past market share companies ruled by hierarchy and topdown leadership Today the new market leaders are mind share companies where influence is more important than power and success relies on collaboration and the ability to inspire Collaborative Intelligence is the culmination of more than fifty years of original research that draws on Dawna Markova's background in cognitive neuroscience and her most recent work with Angie McArthur as a Professional Thinking Partner to some of the world's top CEOs and creative professionals Markova and McArthur are experts at getting brilliant yet difficult people to think together They have been brought in to troubleshoot for Fortune 500 leaders in crisis and managers struggling to

inspire their teams When asked about their biggest challenges at work Markova and McArthur s clients all cite a common problem other people This response reflects the way we have been taught to focus on the gulfs between us rather than valuing our intellectual diversity that is the ways in which each of us is uniquely gifted how we process information and frame questions what kind of things deplete us and what engages and inspires us Through a series of practices and strategies the authors teach us how to recognize our own mind patterns and map the talents of our teams with the goal of embarking together on an aligned course of action and influence In Markova and McArthur s experience managers who appreciate intellectual diversity will lead their teams to innovation employees who understand it will thrive because they are in touch with their strengths and an entire team who understands it will come together to do their best work in a symphony of collaboration their individual strengths working in harmony like an orchestra or a high performing sports team Praise for Collaborative Intelligence Rooted in the latest neuroscience on the nature of collaboration Collaborative Intelligence celebrates the power of working and thinking together at the highest levels of business and politics and in the smallest aspects of our everyday lives Dawna Markova and Angie McArthur show us that our ability to collaborate is not only a measure of intelligence but essential to solving the world s problems and seeing the possibilities in ourselves and others Arianna Huffington This inspiring book teaches you how to align your intention with the intention of others and how through shared strengths and talents you have every right to expect greatness and set the highest goals and expectations Deepak Chopra Everyone talks about collaboration today but the rhetoric typically outweighs the reality Collaborative Intelligence offers tangible tools for those serious about becoming system leaders who can close the gap and make collaboration real Peter M Senge author of The Fifth Discipline I have worked with Markova and McArthur for several years focusing on achieving better results through intellectual diversity Their approach has encouraged more candid debate and collaborative behavior within the team The team not individuals becomes the hero Al Carey CEO PepsiCo Management John R.
