

# *What are Complex Predicates?*

- Complex Predicates are defined as predicates which are composed of more than one grammatical element (either morphemes/words), each of which contributes a non-trivial part of the information of the complex predicate (Alex Alsina 1996).
- Complex Predicates contain (verb + verb) or (noun/adjective + verb) combinations in South Asian Languages (Hook, 1974).

## **Complex Predicates:**

**Complex Predicates** Mengistu Amberber, Brett Baker, Mark Harvey, 2010-04-22 Complex predicates are multipredicational but monoclausal structures They have proven problematic for linguistic theory particularly for proposed distinctions between the lexicon morphology and syntax This volume focuses on the mapping from morphosyntactic structures to event structure and in particular the constraints on possible mappings The volume showcases the coverb construction a complex predicate construction which though widespread has received little attention in the literature The coverb construction contrasts with more familiar serial verb constructions The coverb construction generally maps only to event structures like those of monomorphemic verbs whereas serial verb constructions map to a range of event structures differing from those of monomorphemic verbs The volume coverage is truly cross linguistic including languages from Australia Papua New Guinea Southeast Asia the Indian subcontinent East Africa and North America The volume establishes a new arena of research in event structure syntax and cross linguistic typology Complex Predicates Alex Alsina i Keith, Joan Bresnan, Peter Sells, 1997 A variety of approaches to the question of the range and nature of complex predicates

**Complex Predicates** Ad Neeleman, 1994 **Approaches to Complex Predicates** Léa Nash, Pollet Samvelian, 2016-04-26 Complex predicates can be loosely defined as a sequence of items that behave as a single predicate projecting a single argument structure within a clause Each of the members of the predicate contributes part of the information ordinarily associated with a single head The present volume presents a collection of theoretical linguistic results on the study of complex predicates in different perspectives and with a variety of approaches Important empirical and theoretical issues cutting across various subfields of linguistics are being addressed in this book such as Syntactic and semantic modeling of complex predicate formation compositionality argument structure event structure Differences between syntactic and morphological processes of lexeme formation Typological and diachronic issues in complex predicate formation Neo Davidsonian analyses of abstract predicate decomposition and its morphological correlates Contributors are Ane Berro Denis Creissels Hannah Gibson Adele Goldberg Lutz Marten Annie Montaut L a Nash Pooja Paul Pollet Samvelian Peter Svenonius and Susanne Wurmbrand Complex Predicates Leila Lomashvili, 2011 Complex predicates present different levels of complexity at the syntactic and morphological levels crosslinguistically The focus of this book is a subset of these constructions causative and applicative in three polysynthetic languages of the South Caucasian language family in which the functional morphology associated with the argument structure of these constructions is unusually rich Due to such focus the syntax morphology interface in causative and applicative constructions is subject to scrutiny in two main chapters of the book The analysis includes the argument structure of causatives and applicatives along with the morpho phonological instantiation of the functional heads involved in these constructions The book is written very clearly and is accessible for a wide audience including undergraduate students in the introductory syntax and morphology courses as well as graduate students in basic

syntax courses and seminars in linguistics It naturally appeals to a general linguistic audience interested in theoretical linguistics

*Complex Predicates in Nonderivational Syntax* Erhard Hinrichs, Andreas Kathol, Tsuneko Nakazawa, 2020-06-15 Complex Predicates in Nonderivational Syntax collects recent research in complex predicates within a variety of languages such as German Dutch Italian French Korean and Urdu Recognizing that complex predicates is one of the most active research areas in nonderivational theories of grammar contributors focus on diverse aspects of complex predicate phenomena including order variation constituency relations interactions with other construction types argument relations and the syntax morphology interface Their concentration on issues of linguistically adequate description open these articles to those interested in syntax semantics morphology computational linguistics and natural language processing It includes essays written by the leading researchers in the field including Ivan Sag It makes the clearest and most advanced statement to date about complex predicates

*Argument Realisation in Complex Predicates and Complex Events* Brian Nolan, Elke Diedrichsen, 2017-01-26 This book offers a comprehensive investigative study of argument realisation in complex predicates and complex events at the syntax semantic interface across a wide variety of the world's languages ranging over languages such as German Irish Sicilian and Italian Lithuanian Estonian and other Finno Ugric languages Pitjantjatjara Yankunytjatjara and Ngaanyatjarra from Australia's Western Desert region Japanese Tepehua Totonacan Mexico Cheyenne Mexican Spanish Boharic Coptic and Persian This volume examines the syntactic variation of complex events complex predicates and multi verb constructions within a single clause where the clause is viewed as representing a single event studying their semantics and syntax within functional cognitive and constructional frameworks to arrive at a better understanding of their cross linguistic behaviour and how they resonate in syntax These constructions manifest considerable variability in cross linguistic comparisons of complex predicate formation In European languages for example typically one of the verbs in a verb verb construction highlights a phase of an underspecified event while the matrix verb specifies the actual event In contrast serial verbs require each verb to provide a sub event dimension within a complex event that is viewed holistically as unitary in syntax This book contributes to an understanding of complex events complex predicates and multi verb constructions across languages their syntactic constructional patterns and argument realisation

*Complex Predicates* Alex Alsina, 2000

*Complex Predicates in Japanese* Chiharu Uda Kikuta, 2018-11-01 Originally published in 1994 this volume analyses complex predicate constructions in Japanese in the framework of Head driven Phrase Structure Grammar HPSG The book presents the theoretical framework as a basis of the following analyses and discusses thematic roles reflexive

**The Oxford Reference Guide to Lexical Functional Grammar** Mary Dalrymple,John J. Lowe,Louise Mycock,2019-10-02 This volume is the most comprehensive reference work to date on Lexical Functional Grammar The authors provide detailed and extensive coverage of the analysis of syntax semantics morphology prosody and information structure and how these aspects of linguistic structure interact in the nontransformational framework of LFG The book is divided into three parts The first part examines the syntactic theory and formal architecture of LFG with detailed explanations and comprehensive illustration providing an unparalleled introduction to the fundamentals of the theory Part two explores non syntactic levels of linguistic structure including the syntax semantics interface and semantic representation argument structure information structure prosodic structure and morphological structure and how these are related in the projection architecture of LFG Chapters in the third part illustrate the theory more explicitly by presenting explorations of the syntax and semantics of a range of representative linguistic phenomena modification anaphora control coordination and long distance dependencies The final chapter discusses LFG based work not covered elsewhere in the book as well as new developments in the theory The volume will be an invaluable reference for graduate and advanced undergraduate students and researchers in a wide range of linguistic sub fields including syntax morphology semantics information structure and prosody as well as those working in language documentation and description      **Complex Predicates** Stefan

Müller,2002-01 Complex Predicates examines a number of linguistic phenomena including auxiliary and verb combinations causative constructions predicatives depictive secondary predicates and particle and verb combinations and uses scrambling and fronting data to determine that all except the depictive secondary predicates should be treated as complex predicates M ller s analysis of inflection and derivation is compatible with syntactical analysis of particle verbs as a byproduct it also solves the particle verb bracketing paradox often discussed in the literature      **The Structure of Complex Predicates in Urdu**

Miriam Jessica Butt,1993      *Proceedings of the 9th West Coast Conference on Formal Linguistics* Stanford Linguistics Association,1991 Most of the papers presented at the 1990 West Coast Conference on Formal Linguistics are included in this volume This annual publication not readily available in the past makes the latest research in formal linguistics available to a wider audience Aaron Halpern is a graduate student in linguistics at Stanford University      The Structure of Complex Predicates in Urdu Miriam Butt,1995-07 This book takes a detailed look at two differing complex predicates in the South Asian language Urdu The Urdu permissive in particular brings into focus the problem of the syntax semantics mismatch An examination of the syntactic properties of this complex predicate shows that it is formed by the combination of two semantic

heads but that this combination is not mirrored in the syntax in terms of any kind of syntactic or lexical incorporation

**Morphosyntax** William Croft, 2022-08-04 Taking a functional approach this book provides a thorough overview of Morphosyntax and sets out a framework for syntactic constructions A Grammar of Tariana, from Northwest Amazonia Alexandra Y. Aikhenvald, 2003-08-07 This is a comprehensive reference grammar of Tariana an endangered Arawak language from a remote region in the northwest Amazonian jungle Its speakers traditionally marry someone speaking a different language and as a result most people are fluent in five or six languages Because of this rampant multilingualism Tariana combines a number of features inherited from the protolanguage with properties diffused from neighbouring but unrelated Tucanoan languages Typologically unusual features of the language include an array of classifiers independent of genders complex serial verbs case marking depending on the topicality of a noun and double marking of case and of number Tariana has obligatory evidentiality every sentence contains a special element indicating whether the information was seen heard or inferred by the speaker or whether the speaker acquired it from somebody else This grammar will be a valuable source book for linguists and others interested in natural languages The Manambu Language of East Sepik, Papua New Guinea Aleksandra IŋUŋr'evna Aikhenval'd, Jacklyn Yuamali Ala, Pauline Agnes Luma Laki, 2008-09-04 This book presents the first comprehensive description of the Manambu language of Papua New Guinea Manambu belongs to the Ndu language family and is spoken by about 2 500 people in five villages in East Sepik Province Ambunti district The book is based entirely on the author's fieldwork *Argument Structure and Complex Predicates* Sara Thomas Rosen, 1990
