

NDX Digital Dentures

Guide for Successful Scanning

Copy or Reference Denture Scanning Workflow

A Copy Denture is an exact copy of an existing denture. The tooth shade may be altered.

A Reference Denture is an existing denture that can be used as a custom tray for constructing a new prosthesis.

1. Clinically evaluate the patient and existing prosthesis.
2. For Copy Dentures:
 - The prosthesis should be intact with normal occlusal wear (not broken, chipped, or missing teeth and stable/free from excessive rocking)
 - Borders should be well extended and not excessively (>5mm) short of the ideal
 - The mandibular prosthesis should cover the retromolar pads
 - The maxillary prosthesis should cover the tuberosities
 - The midline should be acceptable
3. Remove any liners, adhesives and excess saliva from the prosthesis
4. Take a border molded reline impression in the upper and lower denture (not applicable for Copy Dentures)
5. Take a bite between the upper and lower while the impression material is in place
6. Stabilize and scan according to your scanner manufacturer's guidelines
7. Clean and return the reference denture to the patient
