The Portable Mentor Mitchell J. Prinstein, 2022-08-04
Psychology is a popular subject to study with thousands entering graduate school each year, but unlike med or pre law, there is limited information available to help students learn about the field, how to successfully apply, and how to thrive while completing doctoral work. *The Portable Mentor* is a useful must-have resource for all students interested in psychology. This third edition is updated and expanded, designed to address students and trainees' need for open dialogue and mentorship. Throughout, it covers some of the common challenges graduates face and features discussions about how to celebrate your identity and find a rewarding, worthwhile career path. It comprises thirty chapters written by more than seventy of the field's top experts, successfully filling a void in professional development advice.

Indian Economy and Socio-economic Transformation S. N. Misra,2004 The Book Is An Amalgam Of Theoretical Analysis And Compelling Reality Divided Into 3 Sets Section I Relates To Human Development Poverty And Empowerment Section Ii Relates To Economic Reforms And Their Impact On Indian Economy And Section Iii Covers Strategy Of Development And Its Sustainability Useful For All That Interested In Latest Developments In Indian Economy *New Scientist* ,2008-07 **Telemonitoring in Diabetes Care Management** Marco ZEIMET,2005-08-06 Master s Thesis from the year 2004 in the subject Health Miscellaneous grade 74 100 Grade A First Class Brunel University DISC Department of IS and Computing course Master of Science Course at Brunel University London language English abstract Topic Area and Motivation Chronic disease care management in diabetes type II patients living at home and supported by telemonitoring equipment has proven to be both working and useful while adding health value from a clinical perspective Managerial decisions need however to be based on quantified cost estimations The challenge today is to show in which patient groups positive cost benefit results can be obtained by the use of telemedicine equipment The problem statement While numerous studies have shown clinical value and economical benefit separately there is a need to identify the cost benefit ratios applicable to different diabetic patient groups with varying risk levels The investment costs in expensive telemonitoring equipment need to be compared to associated clinical benefits obtained in the medium and long term timeframe The interest relevance and importance of the study lays in the cost estimating of care interventions provided to

diabetes patient following care pathways in home care settings While similar work has been undertaken in the acute care settings with start end pathways the cost estimation of the diabetes follow up is challenged by a recurring loop back care pathway Aims and hypothesis While it is assumed that the use of telemedicine equipment and related care intervention costs are compensated by a reduction in complications and related health care costs the aim of the study is to provide a simple model for cost benefit analysis Methods Workload evaluation methods are used to cost estimate and cost quantify identified care pathway variables The resulting cost information is then used as input data in a simple microsimulation model Microsimulation is designed to identify the target group of instable diabetic patients for whom the use of telemedicine supported monitoring would produce both clinical added value and be cost effectiveness as compared to the conventional care delivery model Results The microsimulation model is producing a breakeven point cost benefit levels reached over determined periods of time thus identifying parameters about which patient profiles can be cost beneficially used for the telemedicine modality
