The current track of the CCNA routing and switching contains two exams and two certifications the CCENT ICND1 exam 640 822 and the ICND2 exam 640 816. However it is possible to obtain the CCNA exam 640 802 by one exam and one certification. Now CCENT and CCNA are the most popular entry level networking and internetworking certification programs. The CCENT certification proves that you have a firm foundation in the networking and internetworking field and it proves that you have a solid understanding of IP protocol IP routing switching and many of CISCO device's configurations. The book provides in depth coverage of all official CCNA CCENT exam objectives and uses 2800 router 1841 router catalyst 2960 switch and many other CISCO devices to clarify the required concepts. It provides objective by objective coverage of all the material the student needs to know for the exam signaling out critical information outlining necessary procedures and identifying the exam essentials. The book is composed of ten chapters. Each chapter treats each internetworking entity with clear simple easy to follow sections text boxes and numerous conceptual figures. The book contains more than 313 Figures 33 Exhibits 150 Tables and hundreds of CISCO Switches and Routers Configurations. At the end of each chapter a number of learning questions exam engine with flash cards and a list of the commands which are used in that chapter are given. To make the reader student more familiar with the CISCO exam which is not requiring explaining the answer some of the answers are not provided with explanations. However explanations for these answers can be obtained easily from their questions. This will preserve the reader time by eliminating all the repeated information and it will not waste his/her time by extra statements. To encourage the reader to stop and think as well as to test his knowledge the answers are not given directly after the learning questions instead the answers are listed in Appendix A with complementary discussions. This book uses mainly the passive voice way of writing to give the reader strong straightforward information without confusing the reader by extra not required statements. This way of writing is also used by CISCO for devices configurations and by several computer technical books and operating systems hence the reader will be more familiar with CISCO devices configurations while he/she reads this book. The 2200 questions are distributed across the book as shown below Chapter 1.
