Children Bedtime Story Media Sensation:

Handbook of Early Childhood Teacher Education Leslie J. Couse, Susan L. Recchia, 2015-07-24 This handbook synthesizes both contemporary research and best practices in early childhood teacher education a unique segment of teacher education defined by its focus on child development the role of the family and support for all learners The first volume of its kind the Handbook of Early Childhood Teacher Education provides comprehensive coverage on key topics in the field including the history of early childhood teacher education programs models for preparing early childhood educators pedagogical approaches to supporting diverse learners and contemporary influences on this quickly expanding area of study Appropriate for early childhood teacher educators as well as both pre and in service teachers working with children from birth through 8 this handbook articulates the unique features of early childhood teacher education highlighting the strengths and limitations of current practice as based in empirical research It concludes by charting future directions for research with an aim to improve the preparation of early childhood educators

Making Sense Of Children'S Drawings Anning, Angela, Ring, Kathy, 2004-08-01 Making Sense of Children s Drawings is enlivened with the real drawings of seven young children collected over three years These drawings stimulated dialogues with the children parents and practitioners whose voices are reported in the book The book makes an argument for us to rethink radically the role of drawing in young children s construction of meaning communication and sense of identity It provides insights into the influence of media and consumerism as reflected in popular visual imagery and on gender identity formation in young children It also offers strong messages about the overemphasis on the three Rs in early childhood education

Piaget and Vygotsky in XXI century Nikolay Veraksa, Ingrid Pramling Samuelsson, 2022-08-18 The book provides a comprehensive analyses of Vygotsky s and Piaget s theories implementation in modern preschool education It analyzes the problem of the relationship between the natural and the cultural in the context of Vygotsky and Jean Piaget theories Their discourses complemented each other whereas Vygotsky developed his theory in the direction from society culture to the individual child Piaget s movement was the opposite from individual child to society These two approaches confront modern world with the need to analyze the problem of childhood is childhood a period of cultural exploration or is it a special form of relationship in which both the egocentrism and consciousness of the child and the egocentrism and consciousness of culture are represented Readers will gain insight into the methodology that makes possible to unite up to date views based on Vygotsky and Piaget theories on child development and education

The New Childhood Jordan Shapiro, 2018-12-31 A provocative look at the new digital landscape of childhood and how to navigate it In The New Childhood Jordan Shapiro provides a hopeful counterpoint to the fearful hand wringing that has come to define our narrative around children and technology Drawing on groundbreaking research in economics psychology philosophy and education The New Childhood shows how technology is guiding humanity toward a bright future in which our children will be able to create new better models of global citizenship connection and community

Shapiro offers concrete practical advice on how to parent and educate children effectively in a connected world and provides tools and techniques for using technology to engage with kids and help them learn and grow. He compares this moment in time to other great technological revolutions in humanity's past and presents entertaining micro histories of cultural fixtures: the sandbox, finger painting, the family dinner, and more. But most importantly, *The New Childhood* paints a timely, inspiring, and positive picture of today's children, recognizing that they are poised to create a progressive, diverse, meaningful, and hyper-connected world that today's adults can only barely imagine.

Narratives in Early Childhood Education Susanne Garvis, Niklas Pramling, 2017-05-08. Over the past few decades, a growing body of literature has developed which examines children's perspectives of their own lives, viewing them as social actors and experts in their understanding of the world. Focusing specifically on narratives, this unique and timely book provides an analysis of these new directions in contemporary research approaches to explore the lived experiences of children and teachers in early childhood education, in addition to presenting original research on children's narratives. The book brings together a variety of well-regarded international researchers in the field to highlight the importance of narrative in young children's development from local and global perspectives. While narrative is clearly understood within different countries, this is one of the first texts to build an international understanding, acknowledging the importance of culture and context. It presents up-to-date research on the latest research methods and analysis techniques using a variety of different approaches in order to critically reflect on the future for narrative research and its insights into early childhood education. *Narratives in Early Childhood Education* will be of interest to postgraduate students, academics, and researchers in early childhood education, as well as early childhood professionals, government policy makers, and early childhood organisations and associations.
