Success: 100+ Ideas from Outside the Stacks Elisabeth Doucett,2015-04-13 Today's library leaders face a world in which the only constant is change. Seeking out innovative ways to meet the evolving needs of their communities has become a critical part of their responsibilities. In this book Doucett mines new territory in this ongoing effort by exploring how successful organizations outside the stacks conduct their business. She interviews leaders of advertising, online commerce, fundraising, retailing, crowdsourcing and other organizations including Kickstarter, L.L. Bean, Down East Magazine and Tom's of Maine, among others, learning what they do exceptionally well. From this research she presents more than 100 examples of game changing ideas ready for application in libraries. And most importantly she articulates a simple process that readers can use to pursue the same path of exploration at their own institutions including the actual questions used during her interviews. An exciting survey of creativity in action, Doucett's book will encourage public library directors, managers, trustees and staff to cross pollinate their own expertise with innovative ideas from outside the stacks [**Down from the Trees**](#)

Ralph D. Hermansen,2018-06-26 Down from the Trees: Man's Amazing Transition from Tree Dwelling Ape to Ancestors covers the evolution of man from tree dwelling ape to Homo sapiens as he is today. Using easy to read language, the author takes complex jargon filled material and extracts the essence of the topic and conveys it in a clear and engaging manner. He approaches the subject of human evolution from three different disciplines: fossil evidence and its interpretation, evolutionary theory and its applicability, and genetic evidence and its ability to unlock prehistoric information. The third discipline has advanced unbelievably in the last few years and this book includes the most up to date research. There is nothing more interesting to humans than the story of their origins. The evolutionary process of a tree dwelling ape becoming a walking, talking man who has developed the technology to walk on the moon, transplant hearts or modify living things is no trivial story. This book provides a fascinating and comprehensive view of what science has learned of human evolution [Social Media for Strategic Communication](#)
