**Dataflow and Reactive Programming Systems** Matt Carkci, 2014 Dataflow concepts are the heart of Reactive Programming Flow Based Programming e.g. NoFlo Unix pipes Actors and message passing in general Dataflow systems are easy to design once you understand the large number of implementation details that could drastically change how the system operates Understanding these vectors of change is important so you don't waste your time developing the wrong system By the end of the book you will understand 1 All possible design choices with dataflow like systems 2 How their effects interplay 3 How to develop your own dataflow system Back cover

**Reactive Programming with Node.js** Fernando Doglio, 2016-12-08 Learn how to institute Reactive Programming RP for your back end development with Node.js Up to now RP has most often been used in front end development but with its cutting edge approach you can also transform your back end programming Reactive Programming with Node.js will show you the paradigms of RP why you should use it and the variations available to you You will learn how to use the main libraries necessary to provide an enhanced development experience in Node.js including RxJS Bacon.js Kefir.js and Highland.js You will also create a custom library that provides a variety of key features and learn how to scale up a system developed using RP in Node.js Ideal for back end developers with knowledge of Node.js or JavaScript this book enables you to get up and running with RP in Node.js and revolutionize your back end development What You'll Learn Review the variations of Reactive programming Use the main libraries that provide this type of development experience in Node.js Create a custom library Scale up a system developed using RP in Node.js Who This Book Is For Any back end developers who understand Node.js or are advanced enough to pick up the basics Ideal for developers who have an interest in learning about this different programming paradigm that's being used more and more every day

**Intelligent Decision Technologies** Ireneusz Czarnowski, Robert J. Howlett, Lakhmi C. Jain, 2021-07-07 This book contains selected papers from the KES IDT 2021 conference being held as a virtual conference in June 14-16 2021 The KES IDT is an interdisciplinary conference with opportunities for the presentation of new research results and discussion about them under the common title Intelligent Decision Technologies The conference has been creating for years a platform for knowledge transfer and the generation of new ideas in the field of intelligent decision making The range of topics discussed during the conference covered methods of classification prediction data analysis big data decision support knowledge engineering modeling social networks and many more in areas such as finance economy management and transportation The discussed topics covered also decision making for problems regarding the electric vehicle industry The book contains also several sections devoted to specific topics such as Advances in intelligent data processing and its applications Multi-criteria decision analysis methods Knowledge engineering in large scale systems High dimensional data analysis Spatial data analysis and sparse estimation Innovative technologies and applications in computer intelligence Intelligent diagnosis and monitoring of systems Decision making theory for economics
