

## BACKHOE LUBRICATION POINTS

The backhoe pivot points should be lubricated every 10 hours. If the backhoe is used in severe or abnormal working con-

ditions, reduce the time interval by one-half. Remove dirt from grease fittings before applying grease gun.

## CONTROL LEVER LUBRICATION

Each control lever pivot is provided with a grease fitting. The pivots are initially lubricated at the factory. The pivots should rarely require lubrication because of the protection provided by the control tower. Lubricate the lever pivots every six months or every 1000 hours.

On late production backhoes, the grease fittings are easily accessible through the top of the control tower. On early production backhoes, it is necessary to remove the upper front control tower cover and to disconnect hydraulic lines to boom lockout valves, if so equipped.
