An authoritative and comprehensive account of the bicycle's two hundred year evolution The bicycle ranks as one of the most enduring most widely used vehicles in the world with more than a billion produced during almost two hundred years of cycling history This book offers an authoritative and comprehensive account of the bicycle's technical and historical evolution from the earliest velocipedes invented to fill the need for horseless transport during a shortage of oats to modern racing bikes mountain bikes and recumbents It traces the bicycle's development in terms of materials ergonomics and vehicle physics as carried out by inventors entrepreneurs and manufacturers Written by two leading bicycle historians and generously illustrated with historic drawings designs and photographs Bicycle Design describes the key stages in the evolution of the bicycle beginning with the counterintuitive idea of balancing on two wheels in line through the development of tension spoked wheels indirect drives employing levers pulleys chains and chainwheels and pneumatic tires The authors examine the further development of the bicycle for such specific purposes as racing portability and all terrain use and they describe the evolution of bicycle components including seats transmission brakes lights at first candle based and carriers racks panniers saddlebags child seats and sidecars They consider not only commercially successful designs but also commercial failures that pointed the way to future technological developments And they debunk some myths about bicycles for example the mistaken but often cited idea that Leonardo sketched a chain drive bike in his notebooks Despite the bicycle's long history and mass appeal its technological history has been neglected This volume with its engaging and wide ranging coverage fills that gap It will be the starting point for all future histories of the bicycle *The Moulton Bicycle* Bruce D. Epperson, 2018-05-31

In 1963 British inventor Alex Moulton 1920-2012 introduced an innovative compact bicycle Architectural Review editor Reyner Banham 1922-1988 predicted it would give rise to a new class of cyclists young urbanites riding by choice not necessity Forced to sell his firm in 1967 Moulton returned in the 1980s with an even more radical model the AM his acclaim among technology and design historians owed much to Banham's writings The AM's price tag some models cost many thousands of dollars has inspired tech savvy cyclists to create hot rod compact bikes from Moulton inspired shopper cycles of the 1970s a trend also foreseen by Banham who considered hot rod culture the folk art of the mechanical era The author traces the intertwined lives

of two unusually creative men who had an extraordinary impact on each others careers despite having met only a few times
