Internetworking The Open The Open Courses Library,2019-12-11 Internetworking Computer Networks A Systems Approach There are many technologies that can be used to build last mile links or to connect a modest number of nodes together but how do we build networks of global scale A single Ethernet can interconnect no more than 1024 hosts a point to point link connects only two Wireless networks are limited by the range of their radios To build a global network we need a way to interconnect these different types of links and multi access networks The concept of interconnecting different types of networks to build a large global network is the core idea of the Internet and is often referred to as internetworking Chapter
