Programming with Problem Solving Jacqueline A. Jones,Keith Harrow,2001 Jones and Harrow present programming concepts in the context of solving problems Each chapter introduces a problem first and then covers the C language elements needed to solve it Students can see how a program is built from its simplest beginning to its final polished form This book introduces beginning programming concepts using the C language Each chapter introduces a problem to solve and then covers the C language constructs necessary to solve the problem Rather than presenting a series of polished one step solutions to programming problems this text seeks to lead you through the process of analyzing problems and writing programs to solve them This text is intended to be used in a one or two semester course covering introductory programming using C No previous knowledge of mathematics or computer science is assumed other than a familiarity with the mathematical notation used in a high school algebra course    **Problem Solving and Program Design in C** Jeri R. Hanly,Elliot B. Koffman,2007 For more than a decade hundreds of thousands of students have acquired excellent programming skills by using Problem Solving and Program Design in C to learn programming fundamentals and the C programming language This book remains a best selling introductory programming text for beginners using the C programming language because it provides a structured approach to solving problems To enhance students learning experience the book offers the right number and kind of pedagogical features including end of section and end of chapter exercises examples and case studies syntax and program style display boxes error discussions and end of chapter projects Book jacket    PROBLEM SOLVING WITH C
